

MICHELIN

PILOT ROAD 4

Roadster, Scooter, Sports, Sports Touring, Trail

Champion on wet surfaces especially when braking, MICHELIN Pilot Road 4 tire provides versatility and longevity.

Why choose the MICHELIN Pilot Road 4?

Shorter Braking Time on Wet Surfaces

Thanks to new XST+ sipe technology, the MICHELIN Pilot Road 4 tire offers a 17% shorter braking time than its nearest rival¹ on wet surfaces, and 24% shorter on extremely slippery surfaces such as white traffic lines and pedestrian crossings.

20% Greater Longevity²

With a rubber derived from 2CT technology that's harder in the middle than on the shoulder, the MICHELIN Pilot Road 4 tire lasts 20% longer than the MICHELIN Pilot Road 3 tire. Thanks to its MICHELIN XST+ sipes, it benefits from chamfers which limit uneven wear and tear.

Excellent Grip

Thanks to its patented tread, MICHELIN Pilot Road 4 tire provides optimum grip no matter the motorcycle's lean angle. It also allows for greater water evacuation.

Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN[®] Total Performance[™].
