

MICHELIN

PILOT ROAD 4 TRAIL

Roadster, Trail

The 100% road trail tire providing exceptional longevity and superb braking on wet surfaces.

Why choose the MICHELIN Pilot Road 4 Trail?

Rubber that Sticks to the Road

A new silica-rich rubber means the MICHELIN Pilot Road 4 tire provides exceptional grip no matter the lean angle, at minimum temperatures of -5°C on dry roads and 2°C on wet ones with maximum temperatures of 45°C on all types of roads.

20% Greater Longevity¹

With a harder rubber in the middle derived from 2CT technology, the MICHELIN Pilot Road 4 tire features a 20% longer service life than the MICHELIN Pilot Road 3 tire. Thanks to its MICHELIN XST+ Sipes, it benefits from chamfers, which limit uneven wear and tear.

A Markedly Reduced Braking Time²

Thanks to novel XST+ Sipe technology, the MICHELIN Pilot Road 4 Trail tire provides for 17% shorter braking times on wet roads than its nearest rival, and 24% shorter times on extremely slippery wet surfaces such as white traffic lines and pedestrian crossings.

Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™.
