

MICHELIN

# PILOT STREET RADIAL

Roadster, Sports, Sports Touring, SuperMoto

The radial revolution providing sheer riding pleasure for 250cc motorcycles and higher, for a sporty ride with complete peace of mind.

## Why choose the MICHELIN Pilot Street Radial?

### Stability and Maneuverability

Flexible sidewalls absorb bumps in the road for improved comfort at high speeds. In contact with the ground, the tire tread allows the tire to stick to the road. Its footprint, shorter but wider than a bias-ply tire, provides better grip when taking sharp turns.

### Wet Surface Grip

The 100%-silica rubber mix makes all the difference on wet surfaces and is essential for a safe and sporty use.

### Longevity

Improved pressure distribution on the radial tire's contact patch for more consistent wear and tire and increased performance durability over time.

### A Sporty and Attractive Look

A design taken directly from the Sport Touring Radial lines and a tread inspired by the MICHELIN Pilot Road 2 tire.

### Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™.

## Size details for versions of PILOT STREET RADIAL

### 9 available versions for the MICHELIN PILOT STREET RADIAL

Size
180/55 ZR17 (73W)
