

MICHELIN

# POWER PURE SC

Electric, Roadster, Scooter, Step Thru

1st scooter tire incorporating MICHELIN dual-compound (2CT) technology for greater grip and sportiness.

## Why choose the MICHELIN Power Pure SC?

### MICHELIN 2CT Technology Provides Outstanding Grip

Rubber that is hard in the middle for withstanding sudden acceleration and braking, and soft on the edges for maximizing lean angles. It is the first scooter tire to integrate 2CT technology, originally developed in competition and for the sportiest motorcycles on the market.

### Longevity

Greater longevity thanks to the slick central strip on the front and rear tires: the MICHELIN Power Pure SC tire provides more rubber right where the scooter rider needs it the most.

### Sportiness

Extra sportiness for the tire's entire service life thanks to its tread derived from high-performance motorcycle tires: uneven wear and tear helps maintain a "sportier" profile throughout the entire service life of the tire!

### Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™.
