POWER RS

Roadster, Sports, Sports Touring, SuperMoto, Trail

Unleash your full potential!

Why choose MICHELIN POWER RS tires ?

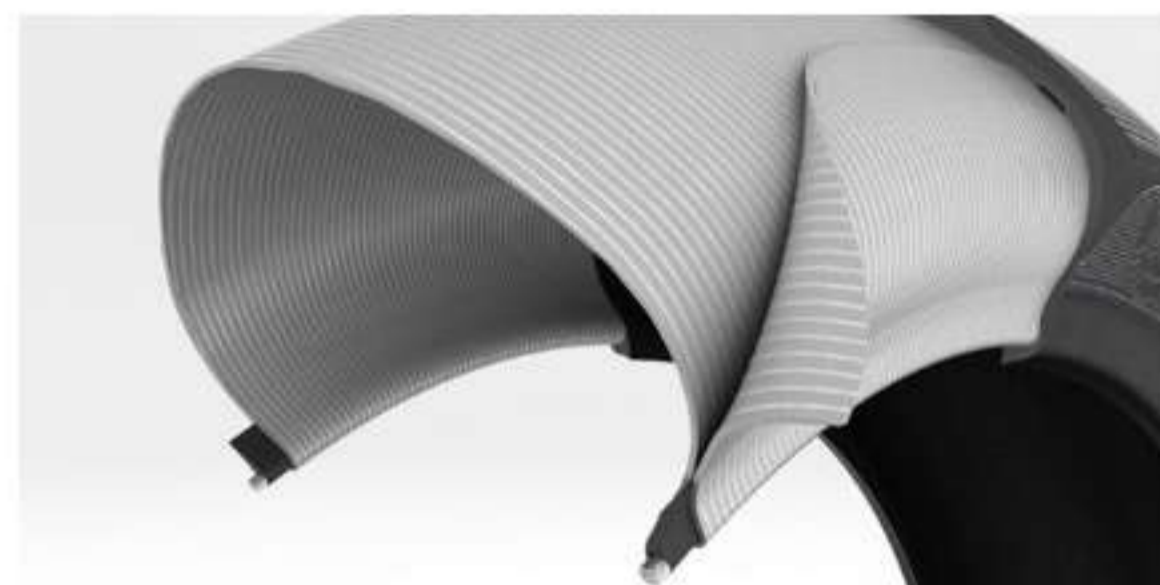

Incomparable Grip and a Unique Experience

Its racing-bred compounds provide incomparable grip and a unique experience for riders. The front tire's racing breeding optimizes the steering force required to lean and gives accurate feedback through turns.

Flawless Stability

The rear tire has been engineered to optimize the pressure exerted on the contact patch. MICHELIN's patented Adaptive Casing Technology+ (MICHELIN ACT+) delivers on the brand's Total Performance promise to ensure flawless straight-line and cornering stability.

The Market's Best Grip¹

The factors that determine a motorcycle tire's sporty credentials include grip and manoeuvrability, as well as handling during changes of lean angle, under braking and when accelerating hard. MICHELIN came out on top in all of these areas in the MTC test¹.

No Sacrifice in Wet Grip²

The MICHELIN POWER RS tire improves upon the already exceptional wet grip of the MICHELIN Pilot Power 3 tire by 3.5 seconds². With MICHELIN 2CT (Dual Compound Technology) at the front and MICHELIN 2CT+ at the rear, MICHELIN POWER RS tires deliver outstanding grip in dry and wet conditions alike.

Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™.
