Why choose the MICHELIN Scorchers 11?

Radial Carcass Means a Sporty Temperament

Inspired by our supersport tires, the MICHELIN Scorchers 11 tire is made with quality materials, such as aramid fiber used in the aviation industry. It has lightness and strength but also an unfailing stability at high speed for the SuperLow™ Sportster.

The Scorchers 11 uses Silica Rain Technology

In order to stick as close to the excellence of Harley-Davidson® motorcycles, our engineers have developed a rubber compound enriched in silica. This performance technology provides excellent grip on wet surfaces. It also guarantees a maximum life.

An Exclusive Design for Legendary Motorcycles

Designed exclusively for Harley-Davidson® motorcycles, and co-branded with the Harley-Davidson® name on the sidewall and distinctive 'Bar & Shield' on the shoulder.

Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™.
