

MICHELIN

STARCROSS 5 HARD

The high-performance motocross tire designed for Supercross use.

Why choose the MICHELIN Starcross 5 Hard?

For the Most Extreme Curves

Hours of thought and countless miles on sunken terrains went into creating one incredible result. For more than three years, our engineers and riders worked side by side to design this exceptional tire, a specialist of Supercross.

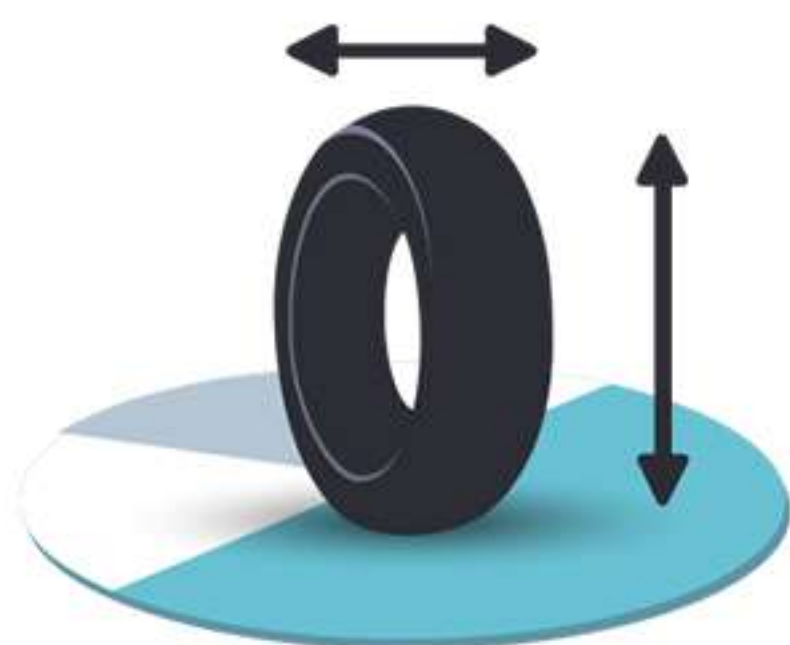

Outstanding Technical Performance

More lightweight and maneuverable, the new MICHELIN Starcross 5 Hard tire features a combination of technologies. The key point is its carcass, which is considerably more flexible. Its performance on straight lines and curves is optimized, providing your motorcycle with improved traction and steadier handling around curves.

A Wide Variety of Sizes

A wider variety of sizes for more extensive usage possibilities.

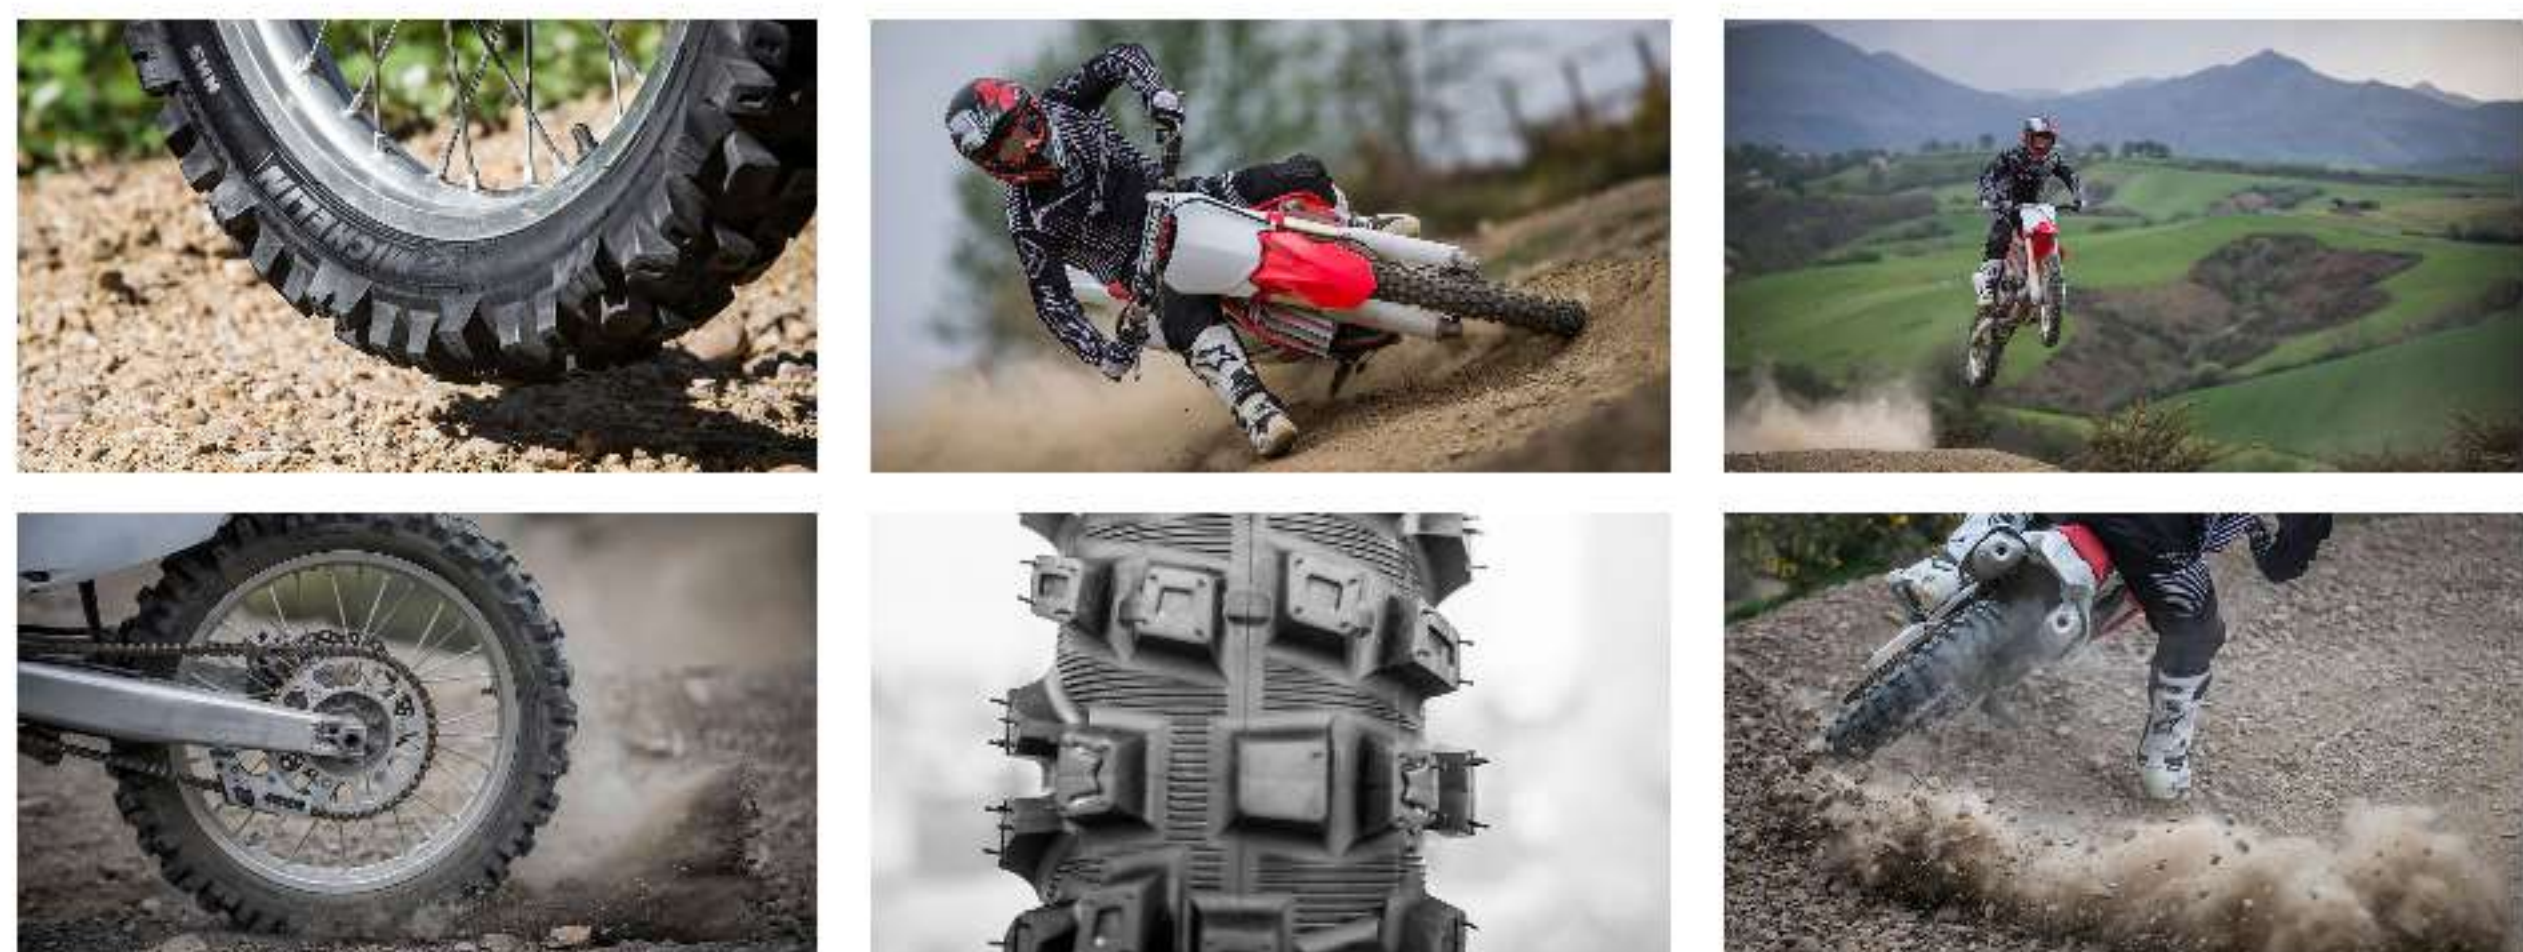

Michelin always aims to bring together multiple performances.

At Michelin, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™.
