

Coolant Recovery Tank, 275cc

The new updated Motion Pro Coolant Recovery Tank is a useful accessory for many riders. For the off road rider, the tank helps prevent the loss of coolant on long hot rides, protecting your engine. For racers, a coolant recovery bottle is required by many organizations. For customizers or fabricators, the small size and variety of mounting and connection options make it a useful accessory.

The Coolant Recovery Tank has a 275cc capacity, and can be connected for either top or bottom inlet. The tank features handy mounting points, and the kit includes instructions, hose, clamps and zip ties for mounting the tank.

Product of the Week - Coolant Recovery Tank, 275cc

- Prevents loss of coolant due to overheating
- Works on most water-cooled motorcycles, snowmobiles, and ATV's
- Designed for hot weather and/or high-altitude riding conditions
- Compact, versatile, high density polyethylene bottle
- Built in mounting holes provide multiple mounting options
- Bottle cap is constructed from chemical-resistant rubber for durability and easy installation/removal
- Includes 275cc bottle, hose, clamps, mounting ties and instructions

When it comes to quality motorcycle cooling parts, Motion Pro is the brand you can depend on.
