

SPRAY ACCU PROTECT

BATTERY PROTECTANT

Description

ACCU-PROTECT is an excellent protectant for battery contacts, battery clamps, electrical connectors, engine connectors, starter connectors, etc. It also prevents electrical resistance and voltage drops between connections. Prevents corrosion from battery acid and wetness.

Advantages

- protects from corrosion

Use

Thoroughly clean all contacts (with warm soda solution) and make connection (tighten screws well). Shake spray can well and apply a thin protective coat from about 10 cm (4 inches) onto connections.

Contents

200 ml
