

MOUNTING SUGGESTIONS:

Harley-Davidson[®]
Sportster 2004-2018
Solo and Passenger Seats

Hardware Solo: Passenger seat:

(Included): Fender nut kit ¼"-20 x 1" buttonhead Allen bolt

Slotted spool washer

Tools needed: Phillips screwdriver

⁵/₃₂" Allen wrench

Note: Certain Mustang seats will not install on 2007-2009 Sportsters or models with specific fuel tanks. Please be sure your seat is correct for your year and tank size.

Removal of stock seat:

One-piece stock seat:

1. Remove the rear 1/4"-20 fender screw with a Phillips screwdriver and set it aside. The stock

rear fender screw will be used to attach your new Mustang seat.

- 2. Remove the handstrap if present.
- 3. Slide the seat up and back to disengage the front bracket and remove the seat.

Installation of Mustang seat:

Solo:

- 1. If center mount near front of rear fender is plugged, remove plug and install supplied fender nut.
- 2. Insert nose tab into frame mount under tank.
- 3. Align rear bracket with fender nut. If installing solo alone, secure the bracket to the fender with the stock screw. If installing a passenger seat, secure to the fender with the supplied 1/4"-20 x 1" buttonhead bolt and slotted spool washer.

Note: The shoulder bolt on the frame is not needed to mount the Mustang solo. A hole in the baseplate will accommodate the bolt. Flex the fiberglass pan when installing to ease the hole around the bolt.

Passenger seat:

- 1. Remove the stock screw mounting the back of the solo and replace with the supplied $\frac{1}{4}$ "-20 x 1" buttonhead bolt and slotted spool washer. The slotted washer should sit directly on top of the solo bracket.
- 2. Align slotted bracket at front of passenger seat with the slotted spool washer mounted above the solo seat's rear bracket, and slide the seat forward to engage the washer.
- 3. Align rear bracket with rear mount in fender and secure with stock screw.

Enjoy the comfort and custom look of your new Mustang seat!
