

NEW RAGE CYCLES

INSTALLATION INSTRUCTIONS

DUCATI SCRAMBLER/SIXTY2

FENDER ELIMINATOR (TUCKED)

- 1 Disconnect white connector for license plate light located in front of swing arm, and re-route underneath bike (picture 1)
- 2 Remove wire from two cable clamps under swing arm
- 3 Remove 3 hugger bracket mounting screws and take hugger off (picture 2)
- 4 Remove splash shield and stock fender (picture 3,4)
- 5 Unplug connectors and remove entire fender
- 6 Remove storage box from underneath seat (picture 5/6)
- 7 To mount belly pan and NRC turn signal bracket to the bike, use 2 stock bolts for lower mounting holes, and 2 supplied M8 bolts underneath tail light. Turn signal bracket sits on top of belly pan (picture 7)
- 8 Route all of your wires under seat and plug into stock harness, making sure both signals and plate light are working

NEW RAGE CYCLES
