Highlights

4000K bright white light

Philips CrystalVision ultra is for drivers who are looking for an upgrade with the style and appearance of Xenon HID, but drive a vehicle with halogen technology. Without compromising on safety, Philips CrystalVision ultra headlights rival the look of HID thanks to the blue coating on the glass and the blue cap bulb which creates a bright white light effect in the headlamp's reflector in daytime.

Enhance the style of your ride

CrystalVision ultra upgrade headlights enhance the style of your vehicle while offering improved performance compared to standard bulbs. Philips CrystalVision headlight bulbs ultra are an excellent choice if you want to add style to your vehicle, without compromising on safety.

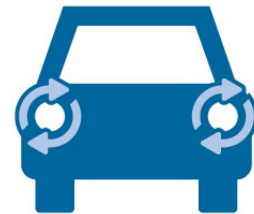

Original equipment quality

Our lighting solutions produce a powerful and precise beam of light with maximum output. We consistently produce the best, most efficient lighting solutions because we know that our high-quality lighting may one day save a life. For over 100 years, Philips has been on the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern cars. Today, one in three cars worldwide is equipped with a Philips light source.

Street-legal

With CrystalVision ultra upgrade headlight bulbs, drivers enjoy a look that is unmatched and a DOT compliant, street-legal bulb.

Replace in pairs

It is simply more efficient to change both headlamps in pairs, rather than only replace the failed one. New, modern bulbs have increased light output and increased performance, offering a safer driving experience. Overall, the benefits and advantages of replacing in pairs are numerous: less hassle, cost savings, avoiding headlight failure, a brighter and more balanced beam, but above all, safety.
