

DIABLO ROSSO™ III

DETAILS

PROPERTY

High performance silica compounds

EFFECT

Wide range of "operative temperature"

Optimal Grip in all condition

PROPERTY

"Flash" Racing tread pattern

EFFECT

Uniform wear
Performance consistency

PROPERTY ✕

WSBK derived Profile

EFFECT

Faster going into lean
Race-like handling

is a trademark of **Pirelli Tyre S.p.A.**

TECHNICAL ADVICES

ROLE AND POSITIONING	TREAD PATTERN	COMPOUND	BENEFITS
-----------------------------	----------------------	-----------------	-----------------

The DIABLO Trademark represents the excellence of the Pirelli Brand in the motorcycle tire industry. The Diablo family has rapidly evolved from its 2002 introduction in the supersport segment to cover many other market segments from Racing to Hypersport. The current Diablo Trademark consolidates 13 years of experience, technology and victories in prestigious tests and competitions. A consistent choice as original equipment by top bike manufacturers, all Diablo marked products are considered a reference by the most acclaimed international magazines. From this history and rich background is born the new DIABLO ROSSO III.

ROLE AND POSITIONING

TREAD PATTERN

COMPOUND

BENEFITS

The tread pattern of the new DIABLO ROSSO™ III derives directly from that of the well-known and highly regarded competition tire DIABLO™ Supercorsa.

Pirelli considered it important to maintain the grooves with the distinctive “flash” pattern on the tread as an expression of competitiveness.

The tread design proves highly effective for water dispersal making the DIABLO ROSSO™ III an extremely safe and high performing tire in the wet.

PATTERN

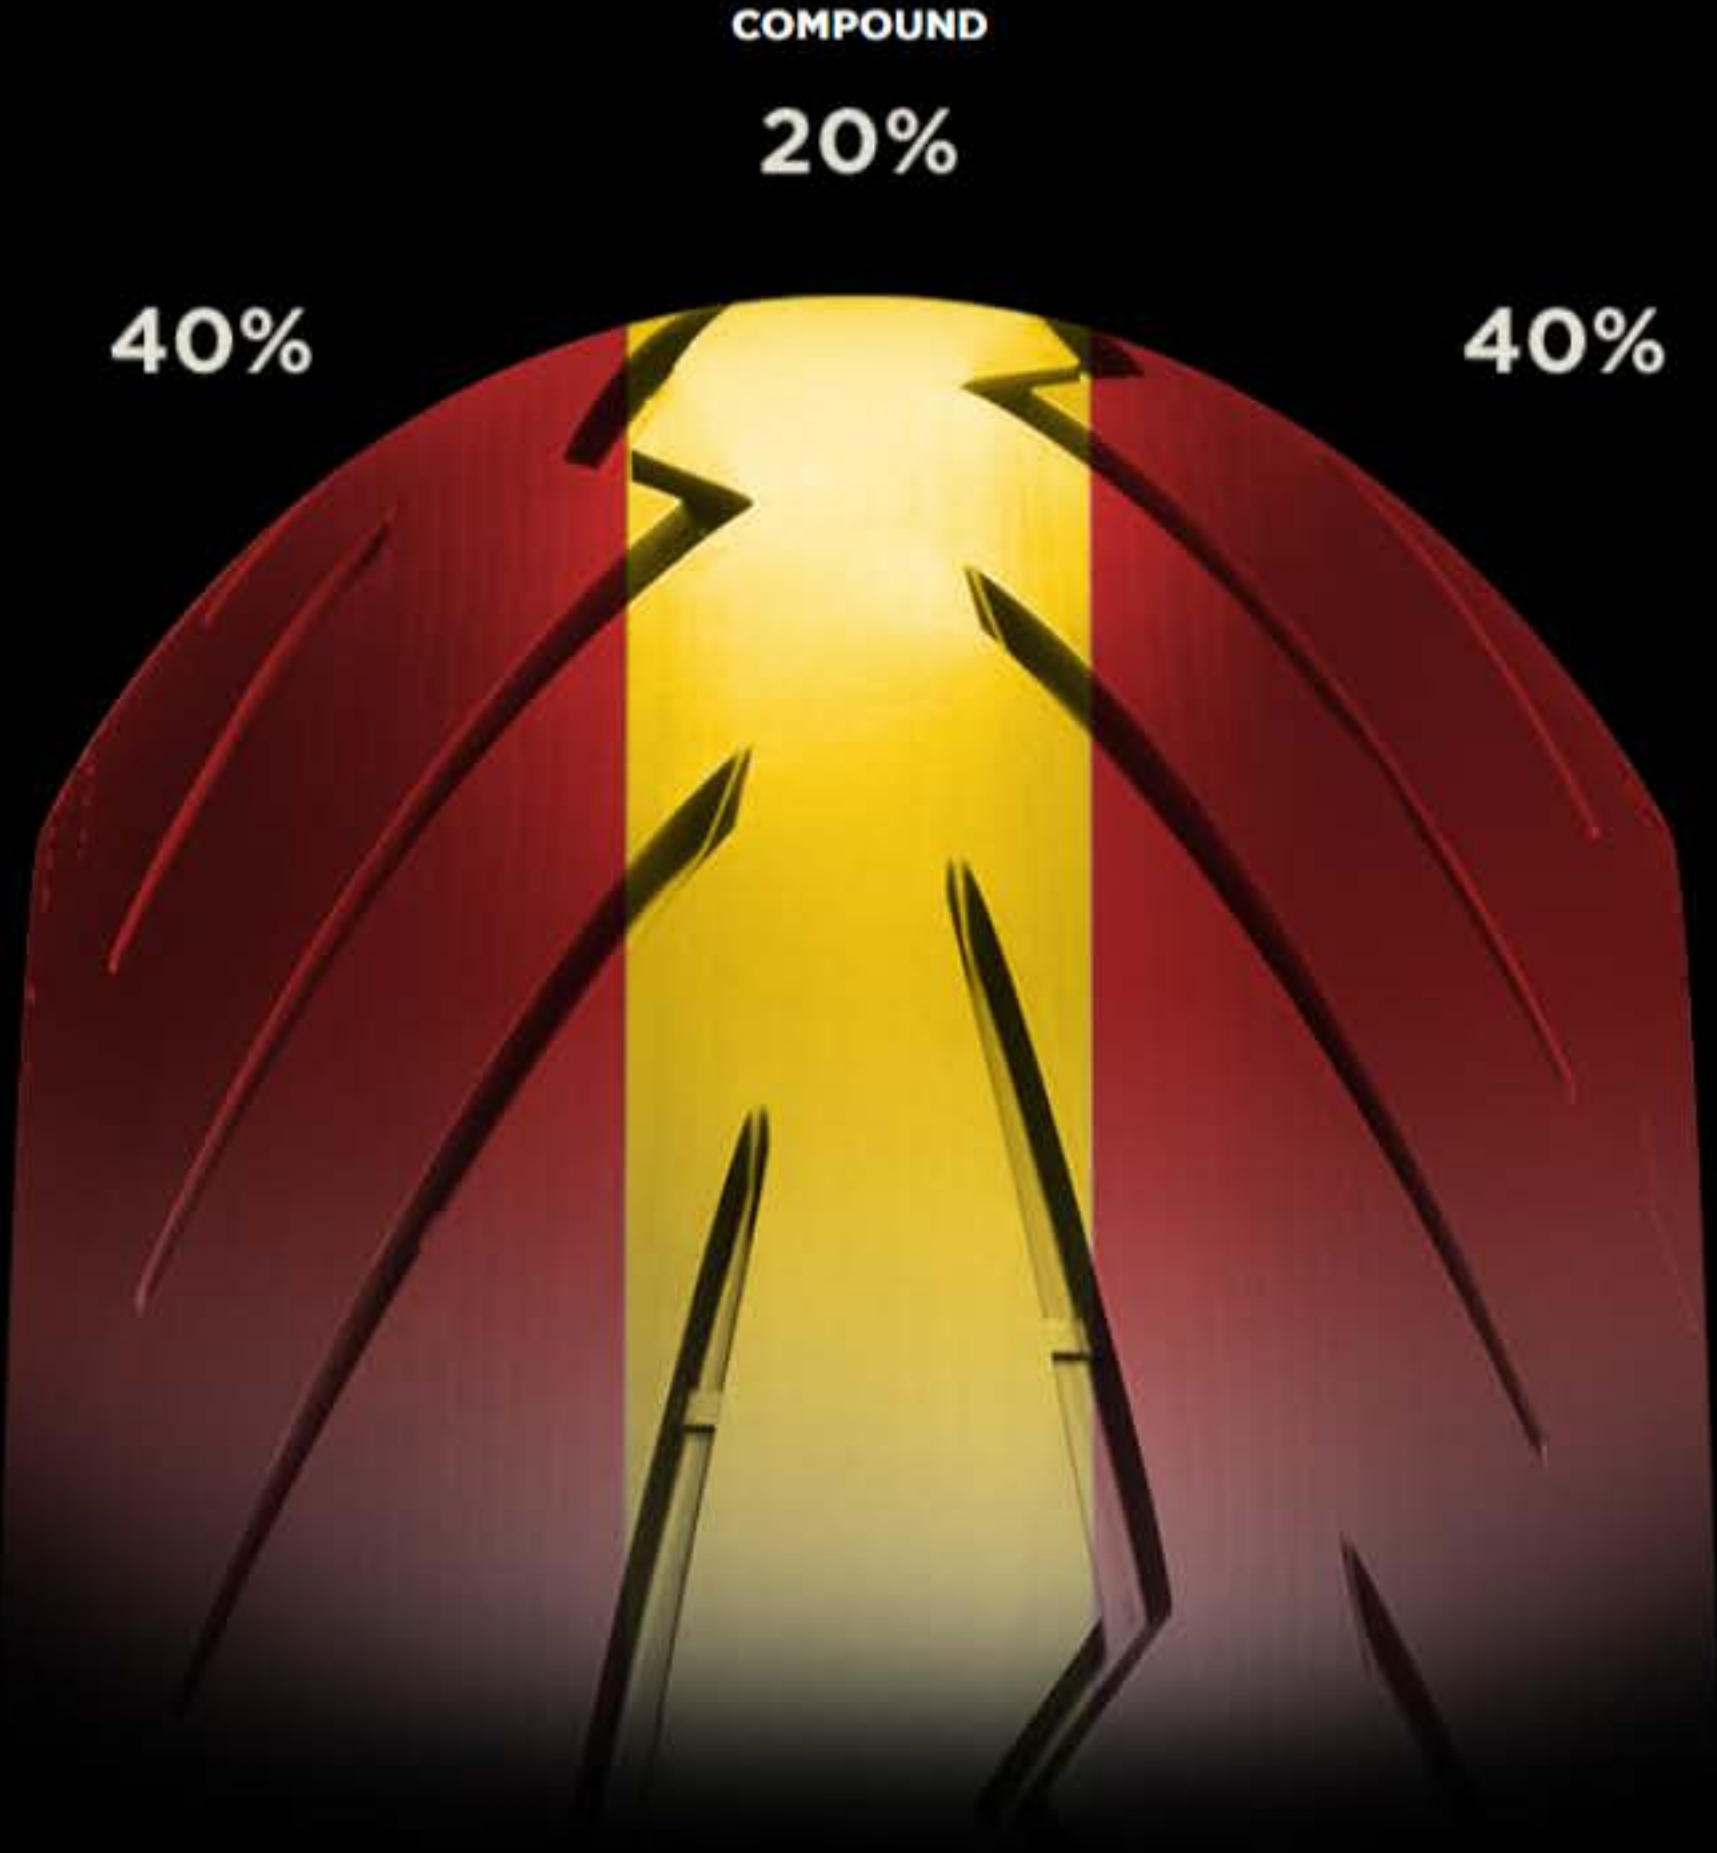

ROLE AND POSITIONING

TREAD PATTERN

COMPOUND

BENEFITS

The rear tire is bi-compound with the profile divided in a proportion of 40-20-40%. The high performance side compound with 100% silica formulation covers a total of 80% of the entire tread. The remaining 20% in the central section is made up of a compound functional to stability and mileage.

ROLE AND POSITIONING

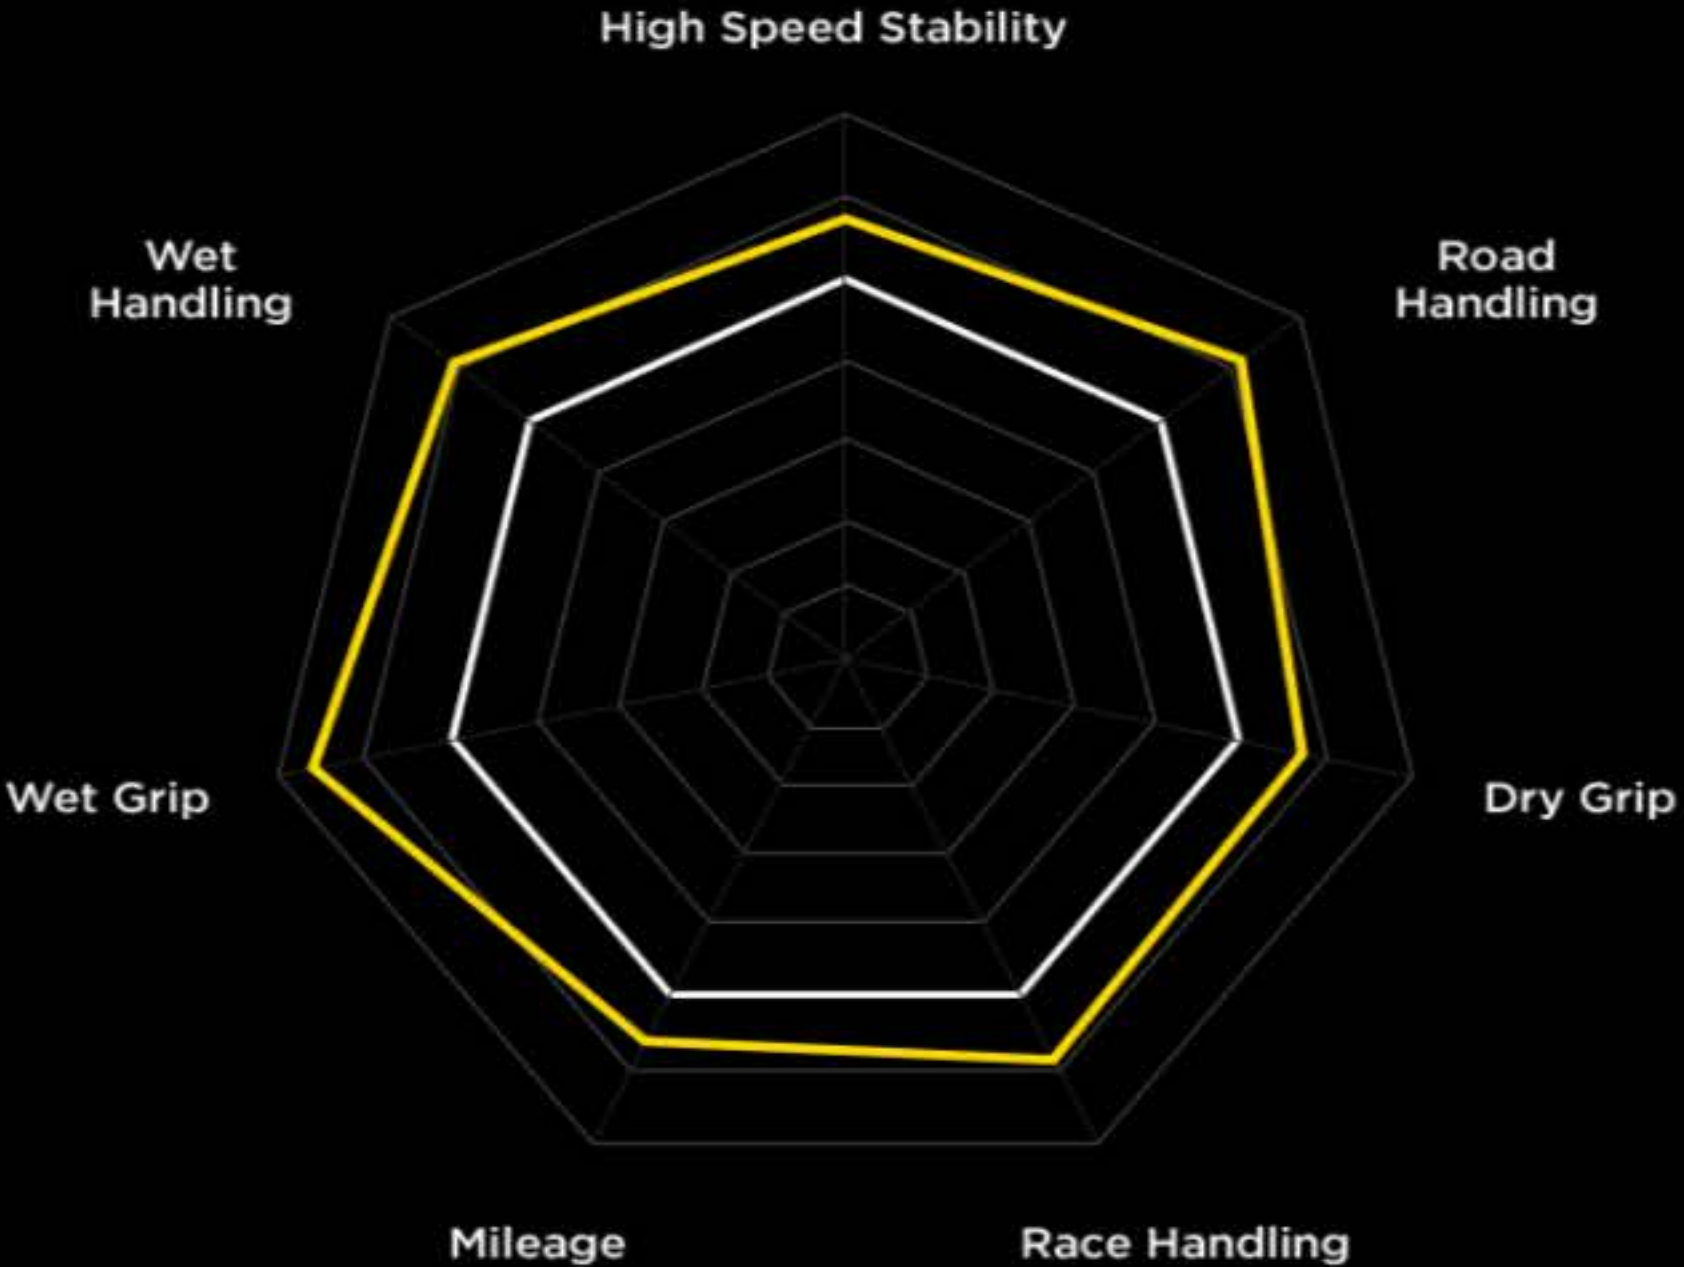

TREAD PATTERN

COMPOUND

BENEFITS

DIABLO ROSSO™ III greatly improves handling, absolute grip and performance in the wet, to guarantee lasting and consistent performance for the whole lifecycle of the tire. DIABLO ROSSO™ III presents new profiles, materials of the latest generation, an innovative structure, new compounds and a tread pattern that is derived directly from that of the DIABLO™ Supercorsa.
