

ANGEL™ GT II

DETAILS

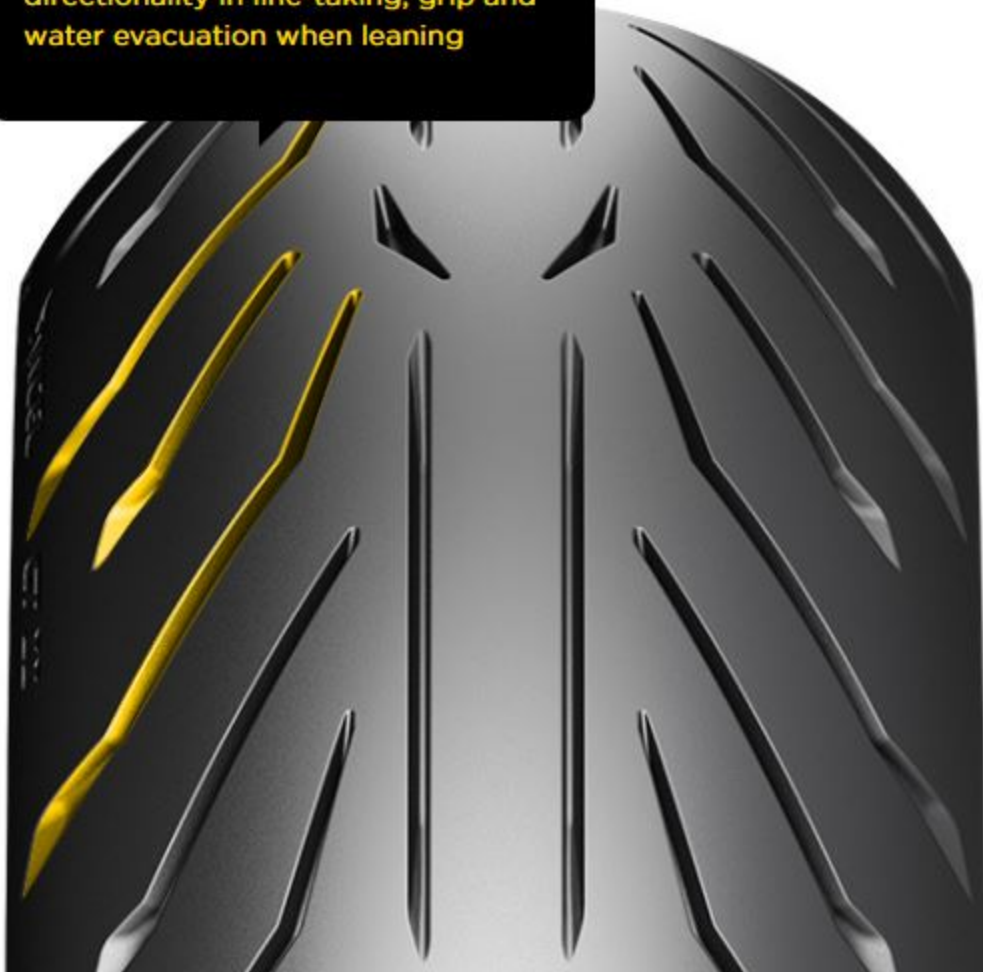

BENEFIT	TECHNICAL EFFECT	TECHNICAL FEATURES
Utilize the full potential of your machine	<p>A significant improvement on bike handling thanks to a consistent footprint, regardless of your lean angle</p> <p>Versatile for both touring and pushing hard, making the best out of the latest generation of electronic rider aids</p> <p>Delivers outstanding performance in wet conditions</p>	<p>New structure with variable cord end count derived from supersport technologies combined with industry-leading compounds</p> <p>High-silica compound matches the new tread design - derived from racing DIABLO™ WET technologies - and coupled with a dedicated contour</p>
Elevate your ride	<p>Prevents the need for unnecessary steering actions which improves comfort</p> <p>Relieves the stress related to the trigger of electronic rider aids</p>	Refined tread design plus a new carcass featuring variable cord end count over tire section
Measure distance by how far your wings carry you	Uniform wear over the duration of the tire preserve PIRELLI DNA until the last mile	Tread design and compounds paired with a specifically-developed profile

PROPERTY

Angled grooves to maximize directionality in line-taking, grip and water evacuation when leaning

PROPERTY

Uniform contact patch promotes even wear and a progressive response to improve handling and stability

PROPERTY

Rayon carcass cord end-count varies over the tire section to promote stability and confidence

A close-up, top-down view of a dark, multi-radius tire tread. The tread features several vertical sipes and curved grooves that create a multi-radius design. A semi-transparent black callout box is overlaid on the center of the tire, containing text in yellow and white. The background is a plain white surface.

PROPERTY

Multi-radius design with a notable center radius generates extended mileage due to a more even distribution of stress

PROPERTY

Twin center longitudinal grooves promote:

- Stability
- Water evacuation
- Grip on low friction surfaces
