SCORPION™ PRO F.I.M.

DETAILS

PROPERTY

Compounds with materials
optimized for use in competitions

EFFECT

Resistance to wear
Long tire life

PROPERTY

Highly resistant polyester carcass
with nylon belts

EFFECT

Increased rigidity, high resistance
and high flexibility to obtain
excellent cushioning features during
braking and overcoming obstacles
Ability to absorb shocks and high
capacity to adapt to the specific
surface

A close-up, low-angle shot of a motorcycle tire tread. The tire is dark grey with prominent, raised, pyramidal-shaped blocks. A yellow callout box is overlaid on the upper part of the tire, containing text. The word 'SCORPION' is visible on the sidewall of the tire. The background is plain white.

PROPERTY

Pyramidal geometry of blocks

EFFECT

Optimal traction and braking with
self-cleaning properties

Precision in bends on all surfaces
