DIABLO™ SUPERCORSA SP

DETAILS

PROPERTY

WSBK derived materials and structure

EFFECT

Low carcass deformation ratio
Increased agility and intuitive handling

A black dome-shaped object, possibly a helmet or a specialized container, is shown against a white background. Two prominent red longitudinal grooves run from the top to the base of the dome. One groove is on the left side, and the other is on the right side. A yellow 'X' icon is located in the top right corner of the black overlay box.

PROPERTY

Long longitudinal groove

EFFECT

Better wear regularity
Performance consistency

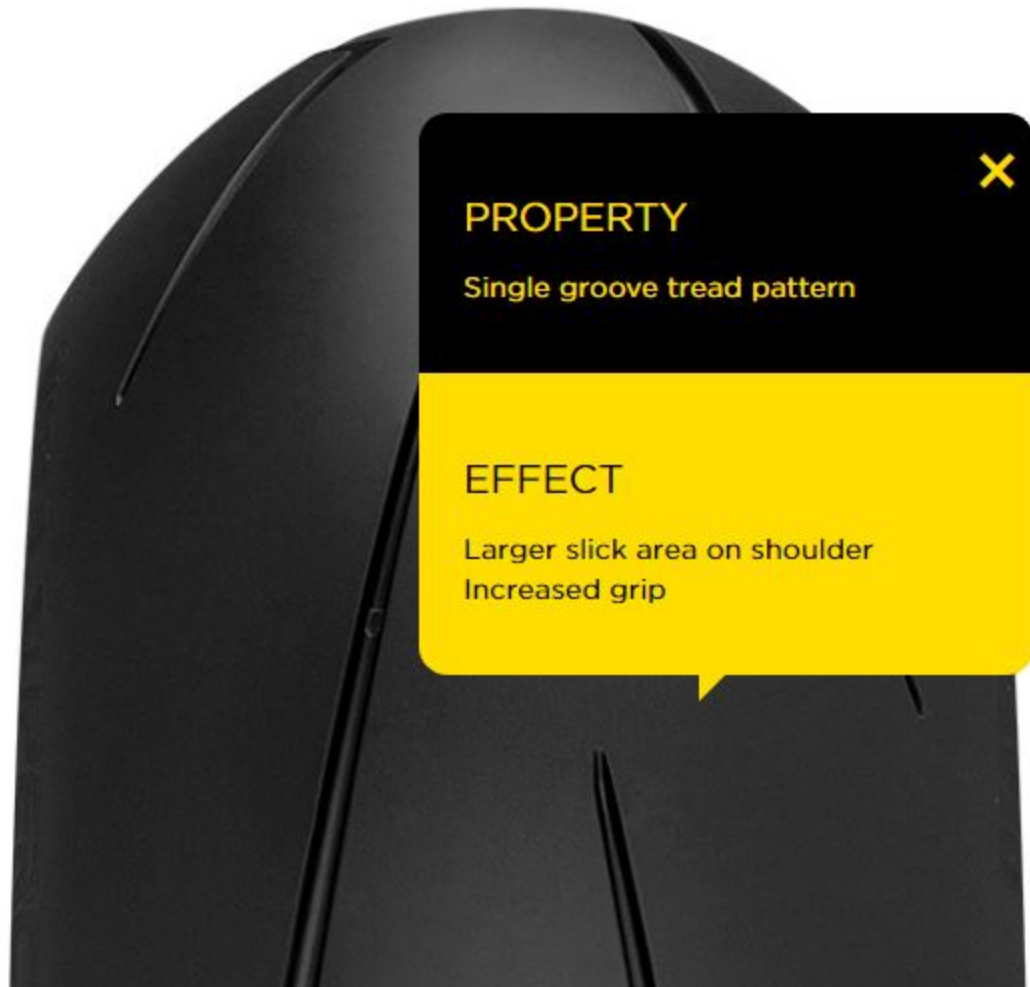

PROPERTY

Bi-Compound rear

EFFECT

Differentiated behaviour of the tyre
Extreme grip in lean combined with
high speed straight stability
