

ROUNDED CONTOUR-PROFILE

PREVENTION

- Use water and neutral soap to clean the windshield.
- Check the tightening of the fasteners periodically.
- Park the scooter facing the sun, avoiding the sun-reflection effect that may damage some parts.
- Park if possible on even surfaces.

Thanks for your attention.

IMPORTANT

"Adjusting the tightening of the nut ID.14 and ID.17 achieves the rotational rotation of the mirror without loss of grip:
When the rear-view mirror receives an impact, it rotates the whole assembly without losing the self-braking.
So the rider, in situ, can return it to its initial position without losing the tension of rotation that was regulated."
