

PORTAMATRICULAS ADAPTABLE A HONDA CBR1000RR 08' -11'

REF: 4731N

INSTRUCTIONS TO ASSEMBLE

- 1- In order to mount the license support, it is needed to cut the two arms of the original support off the motorcycle just below the cowl. Before this action is taken, the cables that goes through one of the arms must be removed.
- 2- Mount the light and turn signals on the support supplied. Tight the cables in the slots (2) with the bridles (supplied) and put them through the hole (3).
- 3- Tight the license support with the cylinders (4 and 6), washers (8), and fasteners (5 and 7). Insert the electric cables through the cowl gap.
- 4- Mounting process of the aluminium plate (10): To tight it, it is needed to make 2 holes diameter 6 on the OEM undertail (underneath the passenger seat). Lay the plate on and mark the holes. Drill the holes making sure the interior wall only is drilled (the drill should not make a hole on the exterior part of the undertail). Tight the plate with the plastic caps (9).
