

ROUNDED CONTOUR-PROFILE

PREVENTION

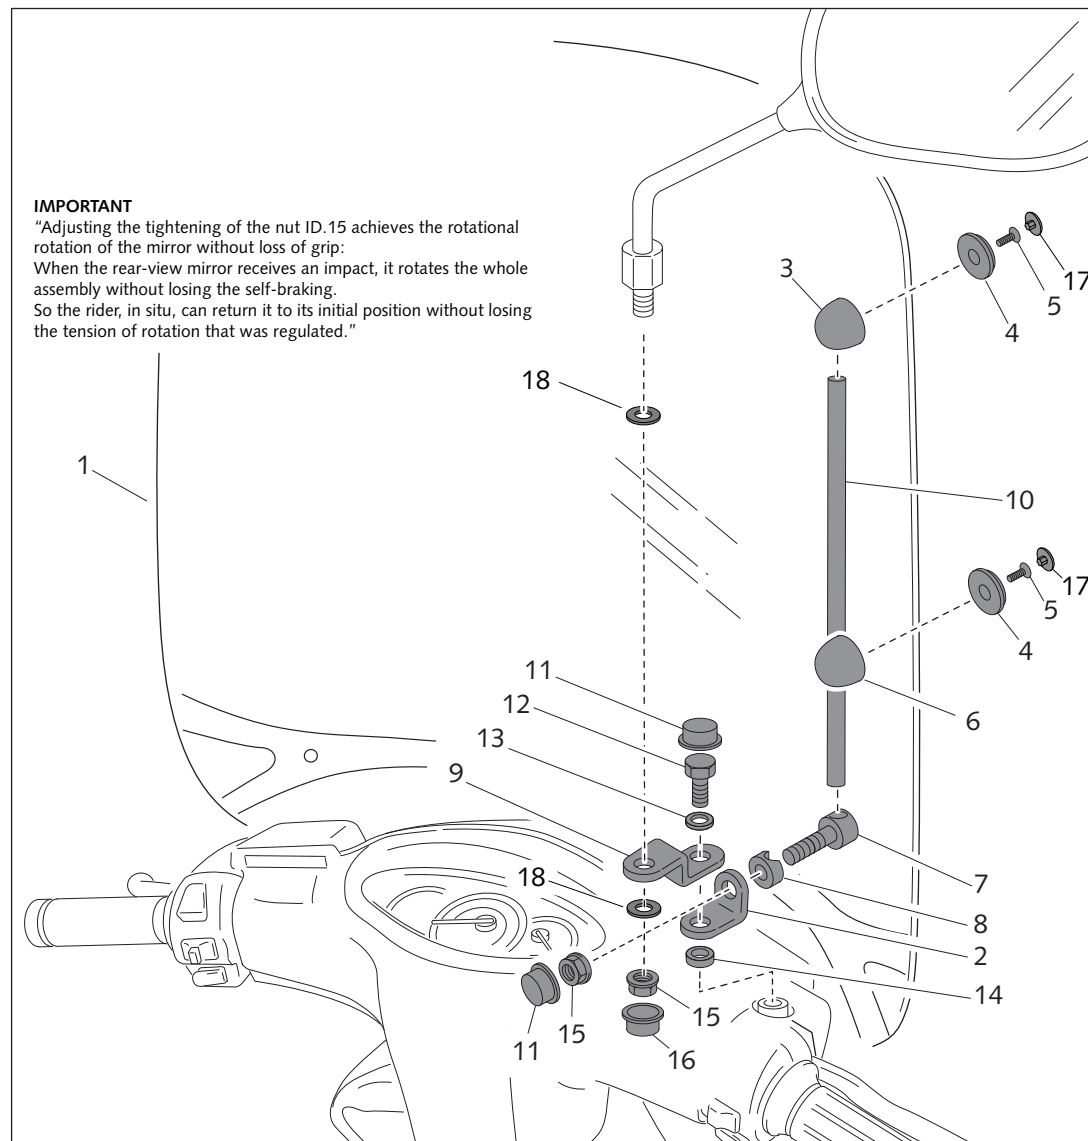

- Use water and neutral soap to clean the windshield.
- Check the tightening of the fasteners periodically.
- Park the scooter facing the sun, avoiding the sun-reflection effect that may damage some parts.
- Park if possible on even surfaces.

Thanks for your attention.

IMPORTANT

"Adjusting the tightening of the nut ID.15 achieves the rotational rotation of the mirror without loss of grip:
When the rear-view mirror receives an impact, it rotates the whole assembly without losing the self-braking.
So the rider, in situ, can return it to its initial position without losing the tension of rotation that was regulated."
