

# INSTALLATION GUIDE

## COMPONENTS

\*Please check all components are included in the package before you go through.

PUIG License Plate Light

Accessories

## INSTALLATION

\*Ask local dealer for assistance if you are not familiar with mechanical engineering.

\*Any damage will occur due to inappropriate installation or assembly.

Separate the OEM license plate light's wire from your bike, make sure the length is just right in the position. Disassemble the OEM light from your bike, and then mount the PUIG license plate light into the position. With included M3 self-tapping screws, please fasten the PUIG license plate light tightly on the license plate.  
+ For a safety ride, always make sure the lighting direction is parallel to your license plate.

## ELECTRICAL CONNECTION

\*Ask local dealer for assistance if you are not familiar with mechanical engineering.

\*Any damage will occur due to inappropriate installation or assembly.

Find the circuit diagram to the original wires in the wire loom for your bike, and connect to the indicator. Connect the red cable of the license support light marked as (+) to the positive cable of the cut cable. Connect the black cable of the license support light marked as (-) to the negative cable of the cut cable.  
+ Please make sure all wiring connection is under water-proof protection.

## TEST & RIDE

\*All operation and usage on road driving should always follow the law restricted by each country.

After installing the light and finishing the wire connecting from the light to bike.

Give a quick test to it. With correct installation, the white light shall spread smoothly on your license plate.

Please make sure the lighting function is right before your every trip, this is for your safety driving.
