**comparativa usando la cupula z racing para bmw s1000 rr*

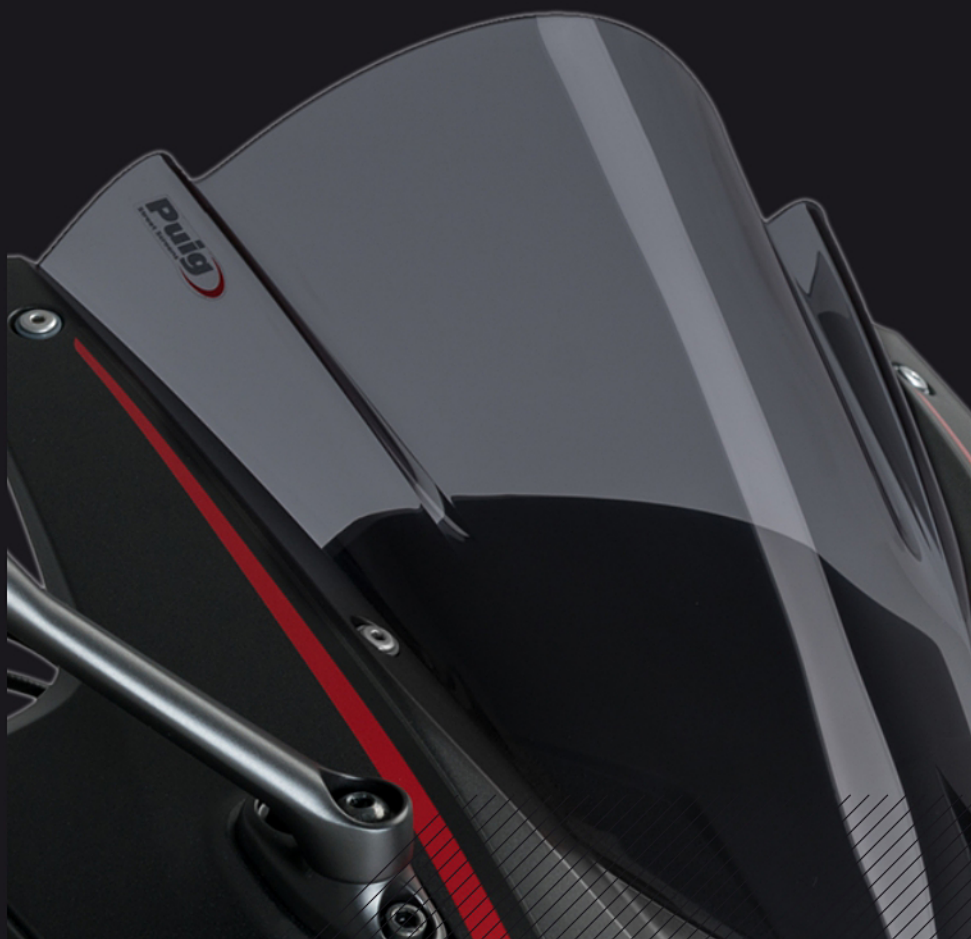

The Z-Racing screens are designed to be aerodynamically more efficient than the original screens of each motorcycle, being tested in the **virtual wind tunnel** to ensure that they improve the aerodynamic coefficient (C_x) and the aerodynamic protection of the rider thanks to its double bubble height design, deflecting the wind that would affect your helmet and upper torso.

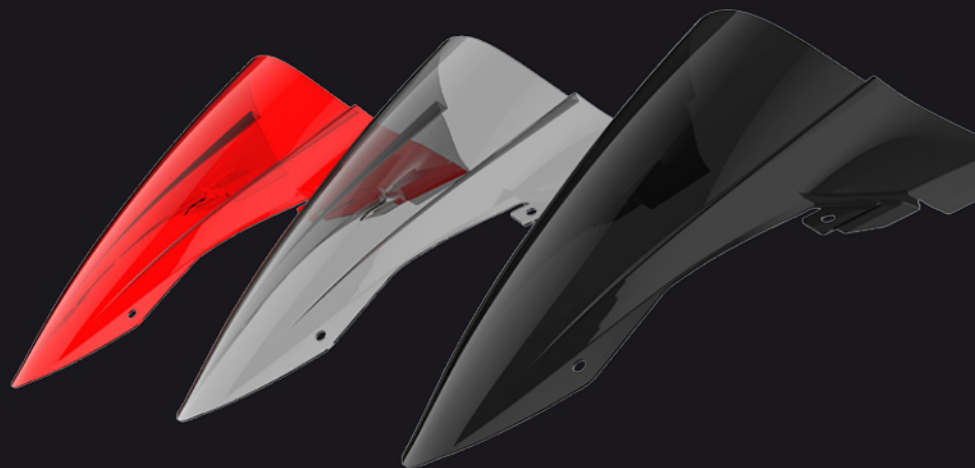

CUSTOMIZATION

Made in Spain, with the most advanced technologies, in 3mm high impact acrylic material, we get a strong, lightweight, durable piece with a rounded part finish > 2mm (complying with the safety regulations of the German TÜV).

Available in a wide range of colors for the customization of your motorcycle, getting the look you want.

GIVE YOUR MOTORCYCLE THE **SPORTS CHARACTER** YOU HAVE ALWAYS WANTED WITH THE PUIG RACING WINDSCREENS.

THE Z-RACING SCREENS LINE IS BASED ON BALANCE BETWEEN AGGRESSIVE AESTHETICS ACCORDING TO YOUR MOTORCYCLE AND THE COMFORT AND FUNCTIONALITY FOR THE PILOT.
