**THIS KIT CONTAINS THE ITEMS PICTURED AND LABELLED BELOW.
DO NOT PROCEED UNTIL YOU ARE SURE ALL PARTS ARE PRESENT.**

Please note that the way the kit is packed does not necessarily represent the way of mounting to the bike

Please note that in cases where kits are packed with rubber washers holding the components onto the bolt – *the rubber washers should be thrown away!*

THE PARTS SHOWN MAY BE REPRESENTATIVE ONLY (FOR CLARITY OF INSTRUCTIONS ONLY)

Digital copies of these instructions are available to download from www.rg-racing.com

GENERAL TORQUE SETTINGS

M4 BOLT = 8Nm
M5 BOLT = 12Nm
M6 BOLT = 15Nm
M8 BOLT = 20Nm
M10 BOLT = 40Nm

R&G Racing

Unit 1 Shelleys Lane, East Worldham, Alton, Hants GU34 3AQ

FITTING INSTRUCTIONS

Near side (left side as you sit on bike)

- Remove the two bolts in position arrowed in pictures 1 and 2.
- Remove the black plastic infill panel to allow access to the side fairing bolts.
- Remove the fairing bolts arrowed in pictures 3, 4, 5, 6, 7 and 8.
- Carefully pull the fairing outwards to disengage the side location spigots and then carefully push forward to disengage front location spigots and remove the fairing.

Off side (right side as you sit on bike)

- Remove the two bolts in position arrowed in pictures 9 and 10.
- Remove the black plastic infill panel to allow access to the side fairing bolts.
- Remove the fairing bolts arrowed in pictures 11, 12, 13, 14 and 15.
- Carefully pull the fairing outwards to disengage the side location spigots and then carefully push forward to disengage front location spigots and remove the fairing.

Near side (left side as you sit on bike)

- Place two of the longer M6 cap head bolts (item 8) into the two holes in the left-hand side main mounting plate (item 9) so the head of the bolts fit into the counter-bore as shown in picture 16.
- Place one of the front mounting blocks (item 10—it is one of the longer blocks) over the exposed bolts so the angled face sits against the main mounting plate as shown in picture 16.
- Place two of the shorter M6 cap head bolts (item 13) into the two holes in the left-hand side main mounting plate (item 9) so the head of the bolts fit into the counter-bore as shown in picture 16.
- Place one of the rear mounting blocks (item 12—it is one of the shorter blocks) over the exposed bolts so the angled face sits against the main mounting plate as shown in picture 16.
- Offer into position as shown in picture 17 (it is worthwhile using a length of electrical tape to prevent marking of the frame) and secure using two of the frame clamps (items 11) the assembly will find its natural position, then tighten all four bolts.

Off side (right side as you sit on bike)

- Place two of the longer M6 cap head bolts (item 8) into the two holes in the right-hand side main mounting plate (item 14) so the head of the bolts fit into the counter-bore as shown in picture 18.
- Place one of the front mounting blocks (item 10—it is one of the longer blocks) over the exposed bolts so the angled face sits against the main mounting plate as shown in picture 18.
- Place two of the shorter M6 cap head bolts (item 13) into the two holes in the right-hand side main mounting plate (item 14) so the head of the bolts fit into the counter-bore as shown in picture 18.
- Place one of the rear mounting blocks (item 12—it is one of the shorter blocks) over the exposed bolts so the angled face sits against the main mounting plate as shown in picture 18.
- Offer into position as shown in picture 19 (it is worthwhile using a length of electrical tape to prevent marking of the frame) and secure using two of the frame clamps (items 11) the assembly will find its natural position, then tighten all four bolts.
- Place the M6 flat caps (item 7) into the heads of all the M6 bolt heads.
- Refit both fairings and infill panels on both sides of the motorcycle.
- Place one of the M12 washers (item 3) onto the one of the M12 bolts (item 2) as shown in picture 21.
- Place one of the locking washers (item 4) onto the bolt so it sits against the washer just fitted as shown in picture 21.
- Place the bolt with both washers into the crash protector (item 5) as shown in picture 21.

R&G Racing

Unit 1 Shelleys Lane, East Worldham, Alton, Hants GU34 3AQ

Tel: +44 (0)1420 89007 Fax: +44 (0)1420 87301 www.rg-racing.com Email: info@rg-racing.com

- Offer this assembly into the threaded hole in the mounting plate as shown in picture A on page 1. Please ensure no parts come in contact with any fairing panels. Finally tighten the crash protector bolts until you feel some compression from inside the protector using 19mm socket and wrench. **PLEASE NOTE THE CRASH PROTECTOR MUST BE POSITIONED AS IN PICTURE 'C' WITH BIGGER END TOWARD FRONT OF BIKE.** Turn a little more so that you feel the compression increase slightly. Tighten to 40Nm of torque (do not exceed this figure, as damage can occur to the motorcycle and the bolt).
- If not already fitted, fit bubble sticker into recess of crash protector cap (item 1).
- Fit crash protector cap (item 1) into the crash protector.

Near side (left side as you sit on bike)

- Place one of the M12 washers (item 3) onto the one of the M12 bolts (item 2) as shown in picture 20.
- Place one of the locking washers (item 4) onto the bolt so it sits against the washer just fitted as shown in picture 20.
- Place the bolt with both washers into the crash protector (item 5) as shown in picture 20.
- Offer this assembly into the threaded hole in the mounting plate as shown in picture B on page 1. Please ensure no parts come in contact with any fairing panels. Finally tighten the crash protector bolts until you feel some compression from inside the protector using 19mm socket and wrench. **PLEASE NOTE THE CRASH PROTECTOR MUST BE POSITIONED AS IN PICTURE 'C' WITH BIGGER END TOWARD FRONT OF BIKE.** Turn a little more so that you feel the compression increase slightly. Tighten to 40Nm of torque (do not exceed this figure, as damage can occur to the motorcycle and the bolt).
- If not already fitted, fit bubble sticker into recess of crash protector cap (item 1).
- Fit crash protector cap (item 1) into the crash protector.

Issue 1 20/07/2017 (NSY)

CONSUMER NOTICE

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorized (if not pre-authorized the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P – at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.

NOTICE DE MONTAGE

R&G Racing

Unit 1 Shelleys Lane, East Worldham, Alton, Hants GU34 3AQ
Tel: +44 (0)1420 89007 Fax: +44 (0)1420 87301 www.rg-racing.com Email: info@rg-racing.com

Côté gauche (lorsqu'on est assis sur la moto)

- Enlever les 2 boulons, voir photos 1 et 2.
- Enlever le panneau interne en plastique noir pour accéder aux boulons de carénage latéral.
- Enlever les boulons de carénage, voir photos 3, 4, 5, 6, 7 et 8.
- Tirer le carénage vers l'extérieur pour désengager les crochets puis pousser vers l'avant pour enlever les crochets avant, puis enlever le carénage.

Côté droit (lorsqu'on est assis sur la moto)

- Enlever les 2 boulons indiqués sur les photos 9 et 10.
- Enlever le panneau interne en plastique noir pour accéder aux boulons de carénage latéral.
- Enlever les boulons de carénage, voir photos 11, 12, 13, 14 et 15.
- Tirer le carénage vers l'extérieur pour désengager les crochets puis pousser vers l'avant pour enlever les crochets avant, puis enlever le carénage.

Côté gauche (lorsqu'on est assis sur la moto)

- Insérer 2 boulons M6 (article 8) dans les 2 trous de la plaque de fixation principale du côté gauche in (article 9) de façon à ce que la tête des boulons de place dans le contre alésage, voir photo 16.
- Placer un des blocs de montage avant (article 10= c'est l'un des blocs les plus longs) sur les boulons exposés de façon à ce que la face inclinée se place contre la plaque de montage principale, voir photo 16.
- Placer les 2 boulons courts M6 (article 13) dans les 2 trous de la plaque de montage principale du côté gauche (article 9) de façon à ce que la tête des boulons se place dans le contre alésage, voir photo 16.
- Placer un des blocs de montage arrière (article 12= c'est l'un des blocs les plus courts) sur les boulons exposés de façon à ce que la face inclinée se place contre la plaque de montage principale, voir photo 16.
- Monter en position, voir photo 17 (Il est conseillé d'utiliser un morceau d'adhésif électrique pour éviter de marquer le cadre) puis fixer en utilisant les 2 plaques de cadre (articles 11). L'ensemble va trouver sa position naturelle. Enfin, serrer les 4 boulons.

Côté droit (lorsqu'on est assis sur la moto)

- Insérer 2 boulons M6 (article 8) dans les 2 trous de la plaque de fixation principale du côté droit (article 14) de façon à ce que la tête des boulons de place dans le contre alésage, voir photo 18.
- Placer un des blocs de montage avant (article 10= c'est l'un des blocs les plus longs) sur les boulons exposés de façon à ce que la face inclinée se place contre la plaque de montage principale, voir photo 18.
- Placer les 2 boulons courts M6 (article 13) dans les 2 trous de la plaque de montage principale du côté droit (article 14) de façon à ce que la tête des boulons se place dans le contre alésage, voir photo 18.
- Placer un des blocs de montage arrière (article 12= c'est l'un des blocs les plus courts) sur les boulons exposés de façon à ce que la face inclinée se place contre la plaque de montage principale, voir photo 18.

R&G Racing

Unit 1 Shelleys Lane, East Worldham, Alton, Hants GU34 3AQ

Tel: +44 (0)1420 89007 Fax: +44 (0)1420 87301 www.rg-racing.com Email: info@rg-racing.com

- Monter en position, voir photo 19 (Il est conseillé d'utiliser un morceau d'adhésif électrique pour éviter de marquer le cadre) puis fixer en utilisant les 2 plaques de cadre (articles 11). L'ensemble va trouver sa position naturelle. Enfin, serrer les 4 boulons.
- Placer les capuchons plats M6 (article 7) dans les têtes de chaque boulon M6.
- Remonter les 2 carénages et panneaux internes des 2 côtés de la moto.
- Placer une des rondelles M12 (article 3) sur un des boulons M12 (article 2), voir photo 21.
- Placer une des rondelles de blocage (article 4) sur le boulon de façon à ce qu'elle se place contre la rondelle tout juste insérée, voir photo 21.
- Placer le boulon avec ses 2 rondelles dans la protection crash (article 5), voir photo 21.
- Monter l'ensemble sur le trou fileté de la plaque de montage, voir photo A sur la page 1. Veiller à ce qu'aucune partie ne puisse toucher les panneaux de carénage. Serrer le boulon de la protection jusqu'à ce que vous sentiez une compression de l'intérieur de la protection avec une clé de 19mm. **LA PROTECTION DOIT ETRE POSITIONNEE COMME EN "C" AVEC LE CÔTÉ ARRONDI LE PLUS GROS EN DIRECTION DE L'AVANT DE LA MOTO.** Tourner un peu plus afin d'accentuer légèrement la compression. Faire un quart de tour. Serrer à 40Nm de couple (Ne pas excéder cette valeur, car cela pourrait endommager la moto et le boulon).
- Si cela n'est pas déjà fait, placez un sticker de caoutchouc dans le creux des bouchons de chaque protection crash (article 1).
- Placer les 2 capuchons (article 1) dans les 2 protections.

Côté gauche (lorsqu'on est assis sur la moto)

- Placer une des rondelles M12 (article 3) sur un des boulons M12 (article 2), voir photo 20.
- Placer une des rondelles de blocage (article 4) sur le boulon de façon à ce qu'elle se place contre la rondelle tout juste insérée, voir photo 20.
- Placer le boulon avec ses 2 rondelles dans la protection crash (article 5), voir photo 20.
- Monter l'ensemble sur le trou fileté de la plaque de montage, voir photo B sur la page 1. Veiller à ce qu'aucune partie ne puisse toucher les panneaux de carénage. Serrer le boulon de la protection jusqu'à ce que vous sentiez une compression de l'intérieur de la protection avec une clé de 19mm. **LA PROTECTION DOIT ETRE POSITIONNEE COMME EN "C" AVEC LE CÔTÉ ARRONDI LE PLUS GROS EN DIRECTION DE L'AVANT DE LA MOTO.** Tourner un peu plus afin d'accentuer légèrement la compression. Faire un quart de tour. Serrer à 40Nm de couple (Ne pas excéder cette valeur, car cela pourrait endommager la moto et le boulon).
- Si cela n'est pas déjà fait, placez un sticker de caoutchouc dans le creux des bouchons de chaque protection crash (article 1).
- Placer les 2 capuchons (article 1) dans les 2 protections.
