

## Kevlar® brand resin

Created using millions of randomly aligned KEVLAR® brand resin particles, the grip adapts to wear as it's used. The material benefits from being soft and durable giving the comfort of a soft grip with the longevity of a hard grip.

## Colours

Complete the look of your bike with the coloured grips. Available in a range of colours to match all of the current motocross machines. Black, Red, Orange, Yellow, Green and Blue.

## Dual Compound

With a hard wearing base material and softer contact patch you get the best of both worlds. The base ensures the grip survives the toughest of punishments whilst the softer contact patch ensures the comfort and feel of a soft grip.

## Racer's choice

Used across the globe by the worlds best racers. Having successfully won championships in AMA Nationals, AMA Supercross, FIM MXGP and FIM MX2 are just a few of the accolades collected by racers using these grips

## Dual Series Explained

Renthal Dual Series combine the durability of our firm compound grips with the feel and absorption of our soft compound.

Maximum durability is achieved by using our firm compound for the inner sections of the grip whilst rider contact areas uses the kevlar® brand compound providing unbeatable comfort and control.
