

A 520 SRS chain designed specifically for off-road, ATV, enduro and desert applications. The R4 ATV Off Road Chain has the following features:

The Renthal "R4-ATV" chain is supplied with both an easy fit split link and a superior solid pin rivet link which matches the durability of the chain.

- Patented self regulating seals dramatically increase the life of the chain
- Larger diameter pins manufactured from specially enhanced steel improve the resistance to shock loads
- A quad riveting process on each pin increases the tensile strength of the chain
- Thicker inner and outer plates increase the fatigue life of the chain
- Available in 520 pitch only, average tensile strength : R4 ATV 520 – 8093 lbf

In the table below you can find the maximum cc recommended for each chain.

Chain Pitch	Enduro	Desert / Dual Sport	Quad	Tensile Strength
520	650cc	650cc	550cc	8093 lbf

Looking for dependable motorcycle drivetrain & transmission parts? Rely on Renthal for quality and long-lasting products.
