

## Ultra Tacky™

The unique properties of the Ultra Tacky™ compound provide the rider with a stronger bond to the handlebar of the motorcycle. This additional bond means you are able to control the bike with less physical output.

## Dual Compound

With a hard wearing base material and Ultra Tacky™ contact patch you get the best of both worlds. The base ensures the grip survives the toughest of punishments whilst the contact patch provides comfort and feel of a soft grip.

## Renew Tackiness

The sticky surface will last for the lifetime of the grip and if it loses its stickiness at any point, simply wash with clean water and allow the grips to air dry to re-activate.

## Racer's choice

Renthal Grips are used across the globe by the worlds best racers. Having successfully won championships in AMA Nationals, AMA Supercross, FIM MXGP and FIM MX2.

Feel the difference with Renthal.
