### **Right-hand side (as you sit on bike)**

- Remove spindle nut and replace with new one supplied in kit (H0003).
- Place the ring type spacer (S0396) over the hexagon of the replacement spindle nut just fitted.
- Fit one nut and washer on spindle-bar (end with shortest thread).
- Feed spindle-bar with nut and washer through the crash protector (B0442 M8) and into the front wheel spindle from the right hand side so nut goes into recess as shown above.
- Place the remaining stepped spacer over the exposed thread on the left hand side so it locates into the spindle.
- Place remaining crash protector over exposed end of spindle-bar.
- Fit washer and nut from kit onto thread and tighten until both nuts are engaged in nylon and equal amounts protrude from either side. Do not overtighten – the nyloc nuts will hold it tight.
