- Fit one spacer (S0115 – 11mm long) into the hexagon shaped recess on the right hand side of the front spindle.
- Fit one nut and washer onto the spindle bar (the end with shorter thread) and engage the nut so the plastic insert of the nut is fully engaged.
- Feed the spindle bar (SB112) with nut and washer through either bobbin (B0442 M8) and through the spacer just fitted.
- Place the remaining spacer (S0115 – 11mm long) over the exposed left hand end of spindle bar so the spacer fits inside the hexagon shaped recess on the front spindle and then slide the remaining bobbin (B0442 M8) onto the spindle bar.
- Fit the washer and nut from the kit onto the thread and tighten until both nuts are engaged in nylon and equal amounts protrude from either side. Do not overtighten - the nyloc nuts will hold it tight.
