

Fitting Instructions for CP0224BL Aero Crash Protectors Ducati Monster 01'-

PLEASE NOTE THAT THE WAY THE KIT IS PACKED DOES NOT NECESSARILY REPRESENT THE WAY OF MOUNTING TO THE BIKE

Please note that in cases where kits are packed with rubber washers holding the components onto the bolt – *the rubber washers should be thrown away!*

- Undo the nut on the engine bolt located mid engine.
- Take R&G tie bar and, with a soft hammer, use it to knock through the OEM bolt leaving equal amounts protruding on each side of the frame.
- Fit the extensions on each end of tie bar (the smaller diameter goes inside the frame) and tighten.
- Fit the protectors with spacers to either side of the bike. Tighten bolt until you feel some compression from inside the protector. Turn a little more so that you feel the compression increase slightly then apply a quarter turn. Do not overtighten as damage can occur to the bike. Do not exceed 40nm of torque.

Due to the risk of cross-threading of bolts etc; we always recommend that our products be fitted by one of our official dealers or a qualified mechanic.
