

RSD offers the best chrome in the business by starting off with a hand polished surface preparation followed by layers of high quality, durable chrome. You will not see a shinier chrome.

RECOMMENDED PRODUCT MAINTENANCE

CHROME-Wash with mild soap and water, use a healthy coat of Carnuba, apply often with a soft cloth.

BLACK ANODIZED-Wash with mild soap and water, no detergents or harsh chemical cleaners that can destroy the black anodized finish. You may use a non-abrasive wax with UV protectant on the black anodized portion of the product to protect it. Never use a harsh or abrasive wax as it will remove the black anodized finish. Avoid exposure to UV rays whenever possible.

CONTRAST CUT-See above for Black Anodized portion. For the milled area on standard Contrast Cut wash with mild soap and water, no detergents or harsh chemical cleaners. To remove stains on the milled area you may use the following methods depending upon the condition of the wheel.

- A mild MAG polish will remove mild stains from the milled area, but will make the milled area shiny as it contains some abrasives. **CAUTION:** Take extreme care not to use this on the black anodized surface of any product as it will remove the black finish.
- Scotch bright can be used to remove more severe stains on the milled area. **CAUTION:** Measures should be taken up to and including masking to ensure that the black anodized surface of any product is not damaged.

BLACK OPS FINISH-Wash with mild soap and water. No detergents or harsh chemical cleaners should be used, as they can destroy the anodized finish. Wax and/or cleaners containing wax are not recommended as they may leave an uneven finish on the matte black surface. Detail spray or WD40 also work well for “dry cleaning” or wipe-down. Due to semi-rough surface of the Black Ops finish, we recommend using a micro-fiber or other lint free type of cloth in order to not leave behind any remnants of the cloth.
