

C3 PRO

DO YOUR THING. WHEREVER. WHATEVER. WHENEVER.

The flip-up helmet for sporty touring drivers. Comfortable and proven 100,000 times.

High-quality materials, thought through operator friendly functions. Tested thoroughly - for your safety. Technical in-depth knowledge and years of experience turn the C3 Pro into the functional wonder that it is.

FOR YEARS THE C3 PRO HAS BEEN THE MOST POPULAR HELMET IN THE SCHUBERTH LINEUP. UNIVERSALLY ADEPT WITH REGARDS TO FUNCTIONALITY, COMFORT AND PROTECTION. THE C3 PRO IS A FLIP-UP HELMET WHICH IS AS SUITED FOR LONG TOURS AS IT IS IN FAST STRETCHES.

FITS PERFECT. FITS SAFE.

The C3 Pro is in accordance with the DOT 218 testing standard, making it road legal throughout North America. The C3 Pro is available in sizes from XS to 3XL. This model helmet conforms to head circumferences from 19 1/2 inches to 25 1/2 inches.

HIGH-TECH SAFETY: THE HELMET SHELL

SCHUBERTH's proprietary outer shell technology combines low weight with optimal stability. Fiberglass with a special resin additive is pressed into the shape under high temperature and pressure. The result is an extremely strong helmet shell. The inner shell is constructed of multiple pieces of high rated EPS foam which enables higher impact reduction and greatly increases the safety of the helmet.

STAY COOL-HEADED: THE INNER LINING

COOLMAX® textiles are used on the inside of the helmet to create an optimal climate. The liner wicks away moisture and helps in conjunction with the ventilation system to keep the helmet at optimum temperature while riding. All the inner liners of the C3 Pro are OEKO-TEX® standard 100 approved meaning they are ensured to be free of harmful chemicals. The liners are also removable and washable to keep your helmet fresh no matter how much you use it.

PRECISE AND SAFE: THE MICRO-LOCK RATCHET

The ratchet lock makes for a quick and easy adjustments and the length of the chin strap can be adjusted on both sides for an ideal fit. The ratchet system is tested and proven to be just as strong and secure as double d-ring systems.

VISION AND CLEAR VIEW:

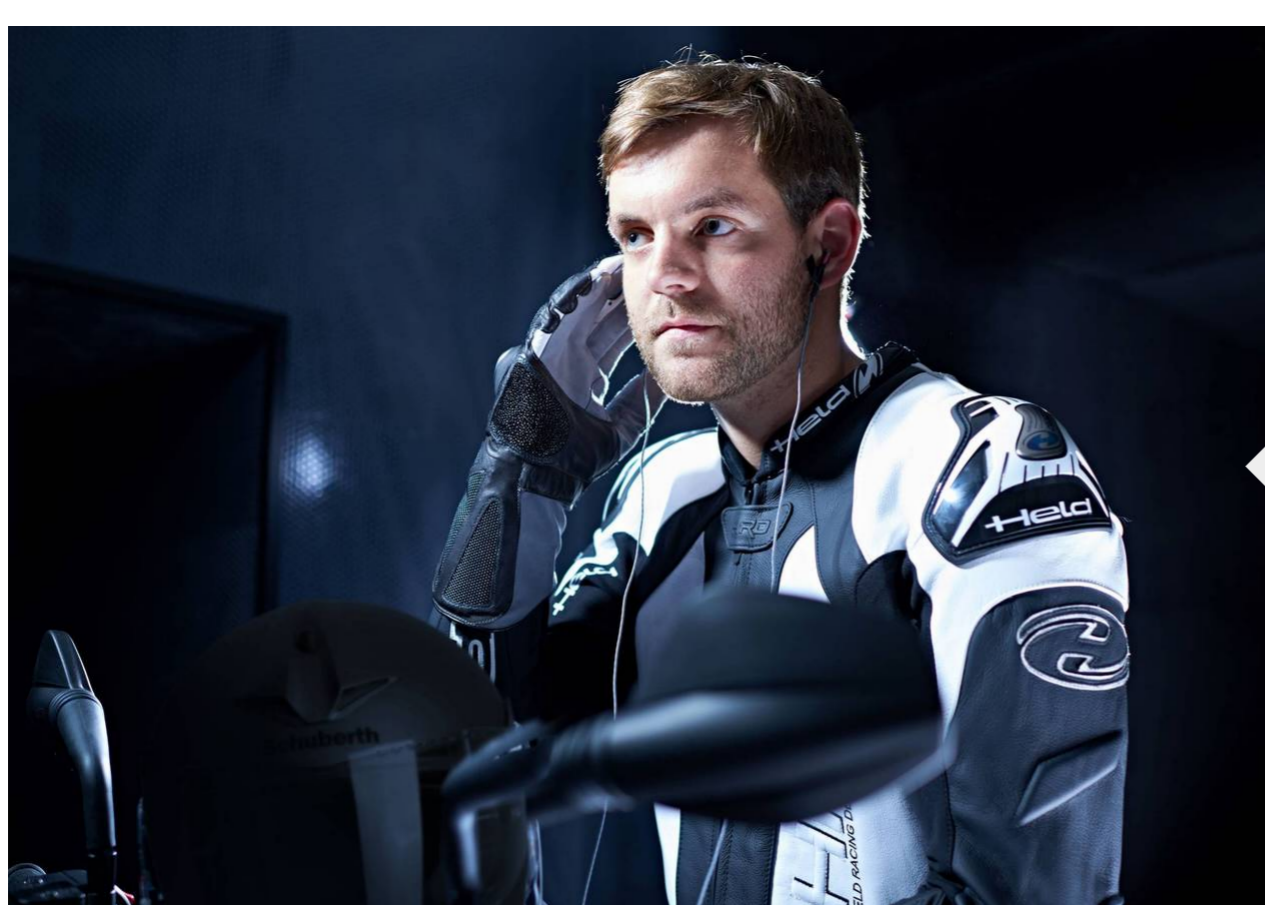

The external shield is made from scratch-proof polycarbonate, manufactured in the injection molding process. The clear shield passes optical class 1 standards, meaning this is as clear and free of distortion as it gets. Change to a tinted shield in seconds, and insert the anti-fog pin lock for a mist-free ride.

WIND TUNNEL SCIENCE: AERODYNAMICS

Crafted by our engineers in the SCHUBERTH wind tunnel, the C3 PRO is optimized for aerodynamics. The result is a smooth and stable ride with no lift or buffeting, even at higher speeds.

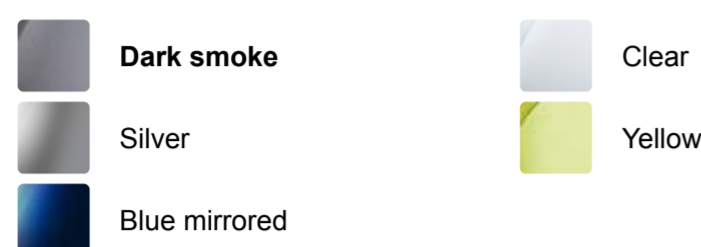

SILENCE IN THE WIND TUNNEL: AEROACOUSTICS

The C3 PRO is one of the quietest helmets in the world. The ergonomically shaped neck roll is designed in conjunction with the chin skirt to reduce wind noise passing under the helmet. Turbulators on the visor help minimize noise and prevent whistling when the visor is open and diffuse wind noise passing over the top and sides of the helmet. The result is a quiet ride and less distraction from the road ahead.

QUICK TRANSITION: THE SUN VISOR

The internal sun visor can be extended or retracted with one hand by using the slider on the edge of the helmet. Now you can react lightning quick to sudden sun glare.

SEE AND BE SEEN: THE REFLECTORS

Like all SCHUBERTH helmets, the C3 PRO has reflective pads at the bottom of the collar, and logos and accent stickers are reflective for additional visibility. Be seen at all times on the road.

BREATHE DEEP: THE VENTILATION

Permanent air circulation means uninterrupted fresh air inlet. The head aeration and the indirect visor aeration lead the air further into the aeration channels of the EPS inner shell and distribute the breathing air evenly in the inner part of the helmet. The ventilation openings can be regulated. An air outlet at the back warrants a constant air stream.

Radio, navigation and communication without adding excess to your helmet

THE SCHUBERTH SRC-SYSTEM™ PRO

Easy to install. Easy to control. Perfectly integrated into the helmet.

DATA SHEET C3 PRO

PRODUCT DESCRIPTION

The C3 PRO has proven to be SCHUBERTH's most legendary modular helmet. A perfect companion for any rider as it performs phenomenally well on long rides as well as at high speeds. The rear spoiler ensures aerodynamic efficiency at its finest, providing more downforce and reducing buffeting. A high-quality interior ensures that the helmet fits comfortably and securely at all times. Additionally, a cleverly designed ventilation concept as well as a comprehensive acoustics package will help riders stay cool. It is probably no coincidence that the C3 PRO has been SCHUBERTH'S most popular helmet for years.

- A helmet that sets the benchmark: uniquely small, extraordinarily light-weight, and outstandingly quiet; carefully crafted in our proprietary wind tunnel for cutting-edge aerodynamics and aeroacoustics
- Flip-up meets sport helmet: brilliant aerodynamic properties make you feel pre-eminently safe at all speeds
- The C3 PRO is prepared to accept the SCHUBERTH communication systems SRC and SC10U

COLORS AND GRAPHICS

- 3 solid colors
- 5 graphics

HELMET SIZES

XS (53) – S (55) – M (57) – L (59) – XL (61) – XXL (63) – XXXL (65)

WEIGHT

Starting at 3.73 lbs.

HELMET SHELL

- Directly processed glass fibre (SCHUBERTH Direct Fibre Processing) combined with a special resin is compressed in a vacuum at high pressure to form an exceptionally sturdy yet uniquely light helmet shell
- Carefully crafted in our proprietary wind tunnel, aerodynamically optimized for high speed stability without buffeting

INNER SHELL

- The complex segmentation of our specially optimized EPS foam liner ensures optimal shock absorption to keep your head protected
- Multipath channels in the EPS liner allow for excellent ventilation throughout the helmet

FEATURES

- Removable and washable inner lining; allergen-free and anti-bacterial (Oeko-Tex 100 certified)
- Coolmax® fabric turns the interior of your helmet into a highly effective moisture removal and cooling system
- FM and Bluetooth antennas integrated into the helmet for optimum reception
- First-class visors offer clear vision without any distortion
- Easy change mechanism for a quick and simple face shield change without the use of tools
- Preinstalled anti-fog lens prevents shield from fogging
- Integrated flip down sun visor
- 2 helmet shell sizes for best fit with excellent protection
- Anti-Roll-Off System (A.R.O.S.) to ensure that helmet is kept in place
- Reflective elements make riding even safer
