

SC1 ADVANCED

FOR C4 PRO, C4 PRO CARBON, C4, R2 AND R2 CARBON

With new functions. Perfectly integrated. Completely invisible.

Firmware update 2.0: Audio multitasking makes it possible to have conversations while listening to music. Sound is crystal clear thanks to HD Voice, and the audio source priority function determines which soundtrack has the higher priority.

Communicate, make phone calls, navigate, listen to music - even on a motorbike, communication is easy and with even more functions.

SC1 Advanced with Advanced Noise Control™ from SENA, 4-way intercom, Bluetooth connection, simple Plug & Play installation, 14 hours talk time, audio multitasking, music sharing, HD Voice and FM radio.

PERFECTLY INTEGRATED COMPLETELY INVISIBLE

The SC1 communication system was developed by SCHUBERTH in cooperation with Sena to ensure even simpler operation and improved comfort. It was designed especially for the C4 and R2 helmets.

The microphone, speakers and antenna are already integrated into the C4 PRO, C4 PRO CARBON, C4, R2 and R2 CARBON helmets as standard. The SC1 module and battery plug into the helmet.

The controls are positioned at the edge of the helmet for accessibility. You can link it up to an optional remote, making it even easier to use.

SUPERIOR PERFORMANCE FOR AUDIO AND CONVERSATION

Pair your SC1 with your phone and satnav so that you can listen to music, make a phone call or hear navigation instructions. A robust Bluetooth connection links up two external devices at the same time.

The SC1 allows four-way communication with your riding buddies. The SC1 Advanced Version features a built-in FM radio. It has up to ten hours talk time, so you're more likely to run out of fuel before the SC1 needs recharging.

RIDE SAFELY WITH: ADVANCED NOISE CONTROL™

Forget about external noise – with Advanced Noise Control™ the wind and road noise is drastically reduced without affecting how you perceive your surroundings.

Customise to your own preferences with the SCHUBERTH Smartphone App.

CONNECTING TO YOUR PHONE

You can use the SCHUBERTH Smartphone App to configure the device settings. Launch the App and then just pair your SC1 with your phone. Then you will be able to:

- Change device settings
- Manage group lists Save favourites (including groups)
- Set up speed dial *
- Start Group Intercom™
- Save pre-set radio stations *

*(SC1 Advanced only)

Optimally equipped. Optionally available:

ACCESSORIES

REMOTE

Full control at your fingertips.

The controls on the innovative Bluetooth® remote are easy to use even with gloves. This means your hands are exactly where they should be when you ride: on the handlebars.

SPARE RECHARGEABLE BATTERY

Even more freedom.

With the spare battery you're ideally equipped even for several days on the road. Ideal for the optional battery charger, which has 2 charging slots.

CHARGER

Two are better than one.

The optional charger can charge up to 2 batteries at the same time. It's the ideal accessory if you use multiple batteries.

RELEASE-TOOL

Release tool for removing the battery and communication module.

Firmware, Manuals and Apps

EVERYTHING YOU NEED.

You will find everything you require for installation, update and operation in one place on the SENA Service website.
