

SC10UA

FOR C3 PRO, C3 BASIC, C3 AND E1

Your personal communication centre with audio multitasking. Top-quality sound – almost invisible.

Firmware update 2.0: The firmware update makes the SC10UA an absolute all-rounder. The audio multitasking allows for conversations while also simultaneously listening to music.

Communicate, make phone calls, navigate, listen to music - communication is really easy now, even on a motorbike.

SUPERIOR PERFORMANCE FOR AUDIO AND CONVERSATION

Listen to the radio as you ride, as well as pairing your SC10UA with your phone and satnav so that you can listen to music, make a phone call or hear navigation instructions. A robust Bluetooth connection links up two external devices at the same time. The SC10UA allows four-way communication with your riding buddies. It has up to ten hours talk time, so you're more likely to run out of fuel before the SC10UA needs recharging.

RIDE SAFELY WITH: ADVANCED NOISE CONTROL™

Thanks to Advanced Noise Control™, incoming and outgoing audio signals (such as music, telephone, intercom and navigation) are not affected by ambient noise.

Customise to your own preferences with the SCHUBERTH Smartphone App.

CONNECTING TO YOUR PHONE

You can use the SCHUBERTH Headset App to configure the device settings. Launch the App and then just pair your SC10UA with your phone. Then you will be able to:

- Manage group lists
- Save favourites (including groups)
- Set up speed dial
- Start Group Intercom™
- Save preset radio stations
- Change device settings

Now for **Apple iOS**

Optimally equipped. Optionally available:

ACCESSORIES

REMOTE

Full control at your fingertips.

The controls on the innovative Bluetooth® remote are easy to use even with gloves. This means your hands are exactly where they should be when you ride: on the handlebars.

Firmware, Manuals and Apps

EVERYTHING YOU NEED.

You will find everything you require for installation, update and operation in one place on the SENA Service website.
