

10R

LOW-PROFILE MOTORCYCLE BLUETOOTH® HEADSET & INTERCOM

Low profile, yet rich with high-performance features, the 10R lets riders make hands-free phone calls, listen to music, get GPS directions, and have full-duplex intercom conversations with other riders in crystal-clear audio quality.

HELMET COMMUNICATION FOR PERFORMANCE-MINDED RIDERS

LOW PROFILE, POWERFUL CAPABILITIES, CRYSTAL CLARITY

MINIMIZE THE FUSS

Slim, Light, Easy to use

Low profile, yet rich with high-performance features, the Sena 10R lets riders make hands-free phone calls, listen to music, get GPS directions, and have full-duplex intercom conversations with other riders in crystal-clear audio quality through the stereo Bluetooth® headset. Ultra slim and featherlight, it's a particularly good choice for riders who want to concentrate on their riding technique and minimize fuss factor. Motorcycle Bluetooth communication has never been so easy.

BLUETOOTH HANDLEBAR REMOTE CONTROL

Full control at the tip of your fingers

The innovative Bluetooth® **Handlebar Remote** puts the controls where you can easily see and use them with a gloved hand, without interrupting the rhythm and safety of your ride. This intelligent motorcycle Bluetooth remote simplifies your ride so that you can focus on what matters.

FLEXIBLE, EFFORTLESS CONNECTIVITY

Talk or share playlists with four-way intercom functionality

Keep the chitchat going, share a playlist with up to four riding companions, or patch in a phone call that everyone can jump in on. The Bluetooth® 4.1-equipped 10R does it all with crystal-clear sound quality and proprietary noise-reduction technology at ranges of up to 900 meters (0.5 miles).

ENHANCED USER EXPERIENCE

Extra volume, less noise, and helpful voice prompts when you need them

Audio levels get a boost in noisy environments while Advanced Noise Control™ technology cuts down on background noise for both incoming and outgoing audio. Bluetooth music playback control features play, pause, track forward, and track back functions, and each audio source has its own adjustable volume level.

Easy-to-follow voice prompts will get you started using your 10R Bluetooth motorcycle communication system. And if your pals don't have Sena Bluetooth® intercom gear, Sena's **Universal Intercom™** firmware makes the 10R compatible with all other Bluetooth® communications systems on the market. Best of all, it's upgradeable for the life of your headset, which makes pairing and interoperability across brands a non-issue for as long as you own the 10R.

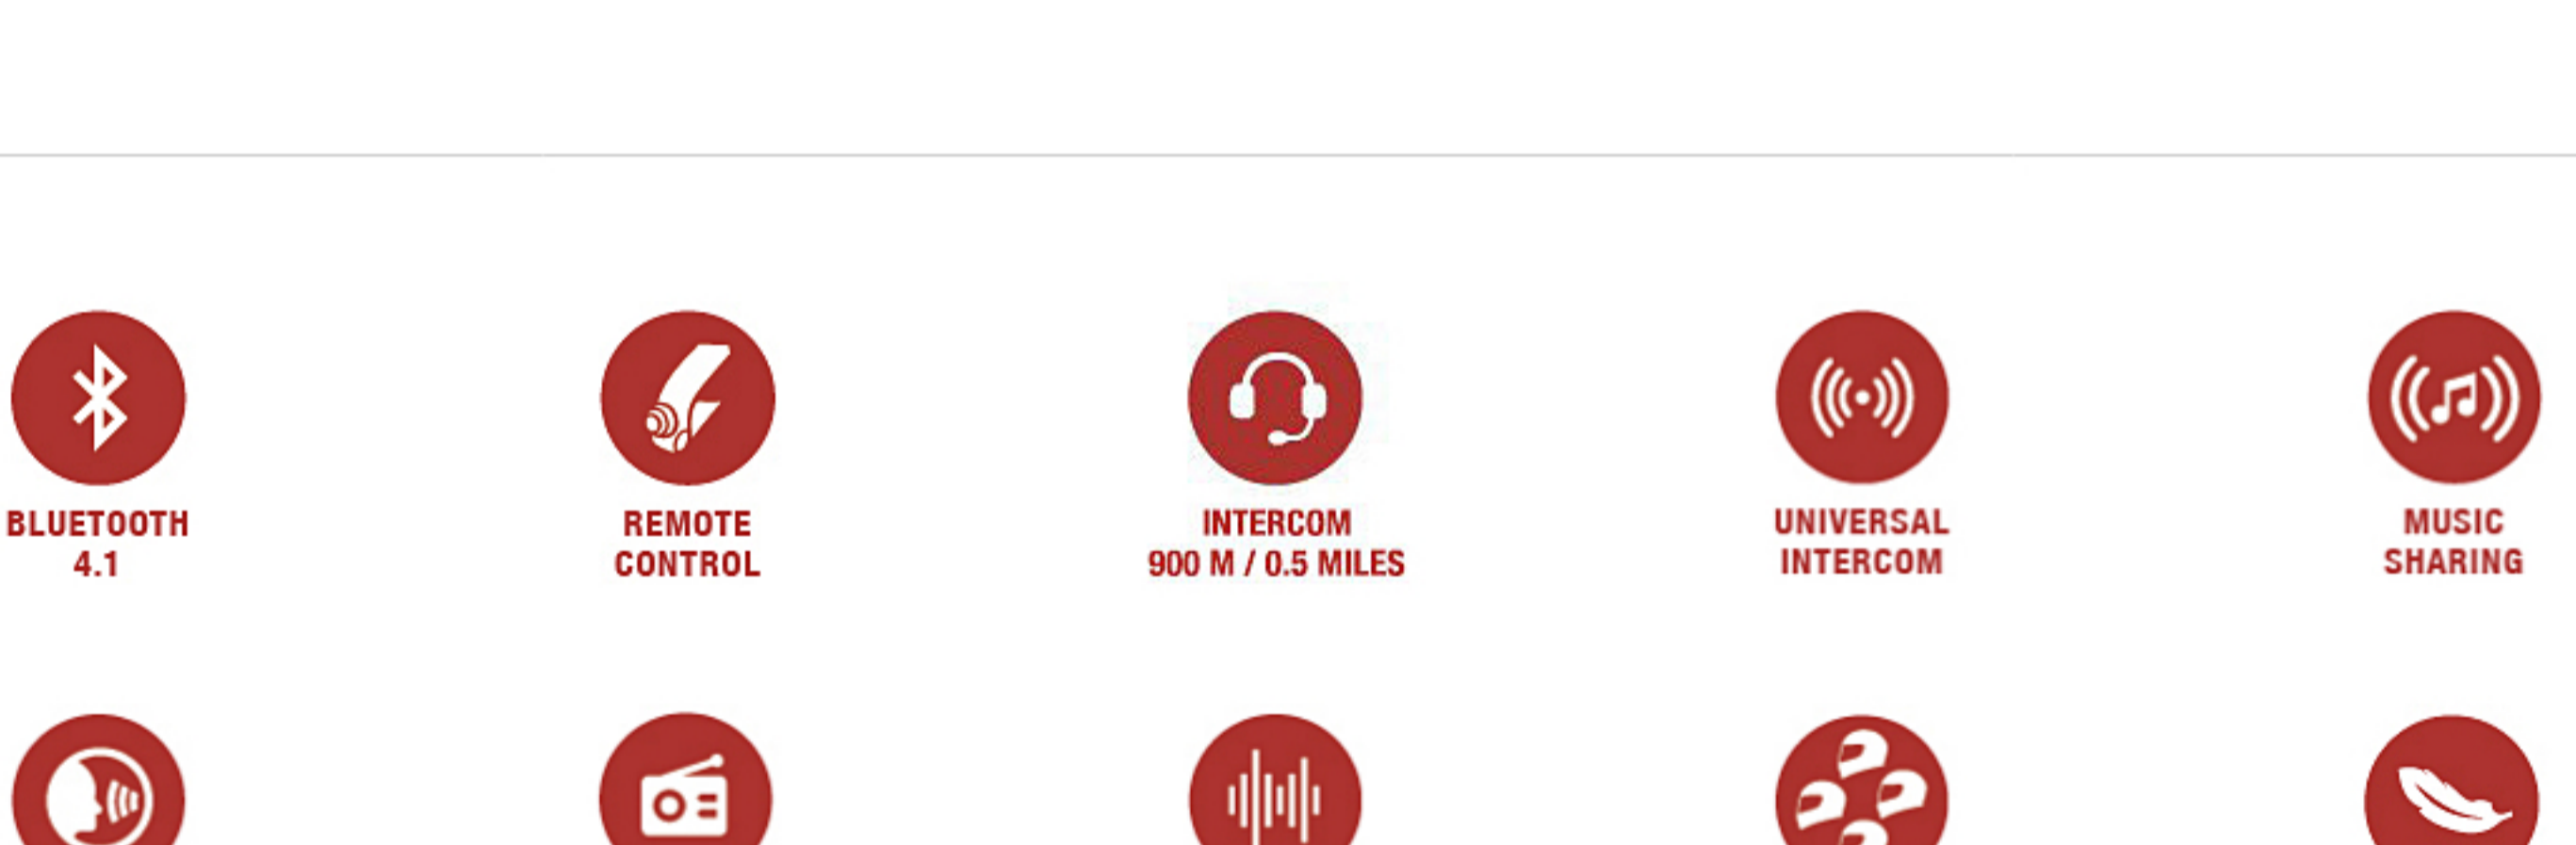

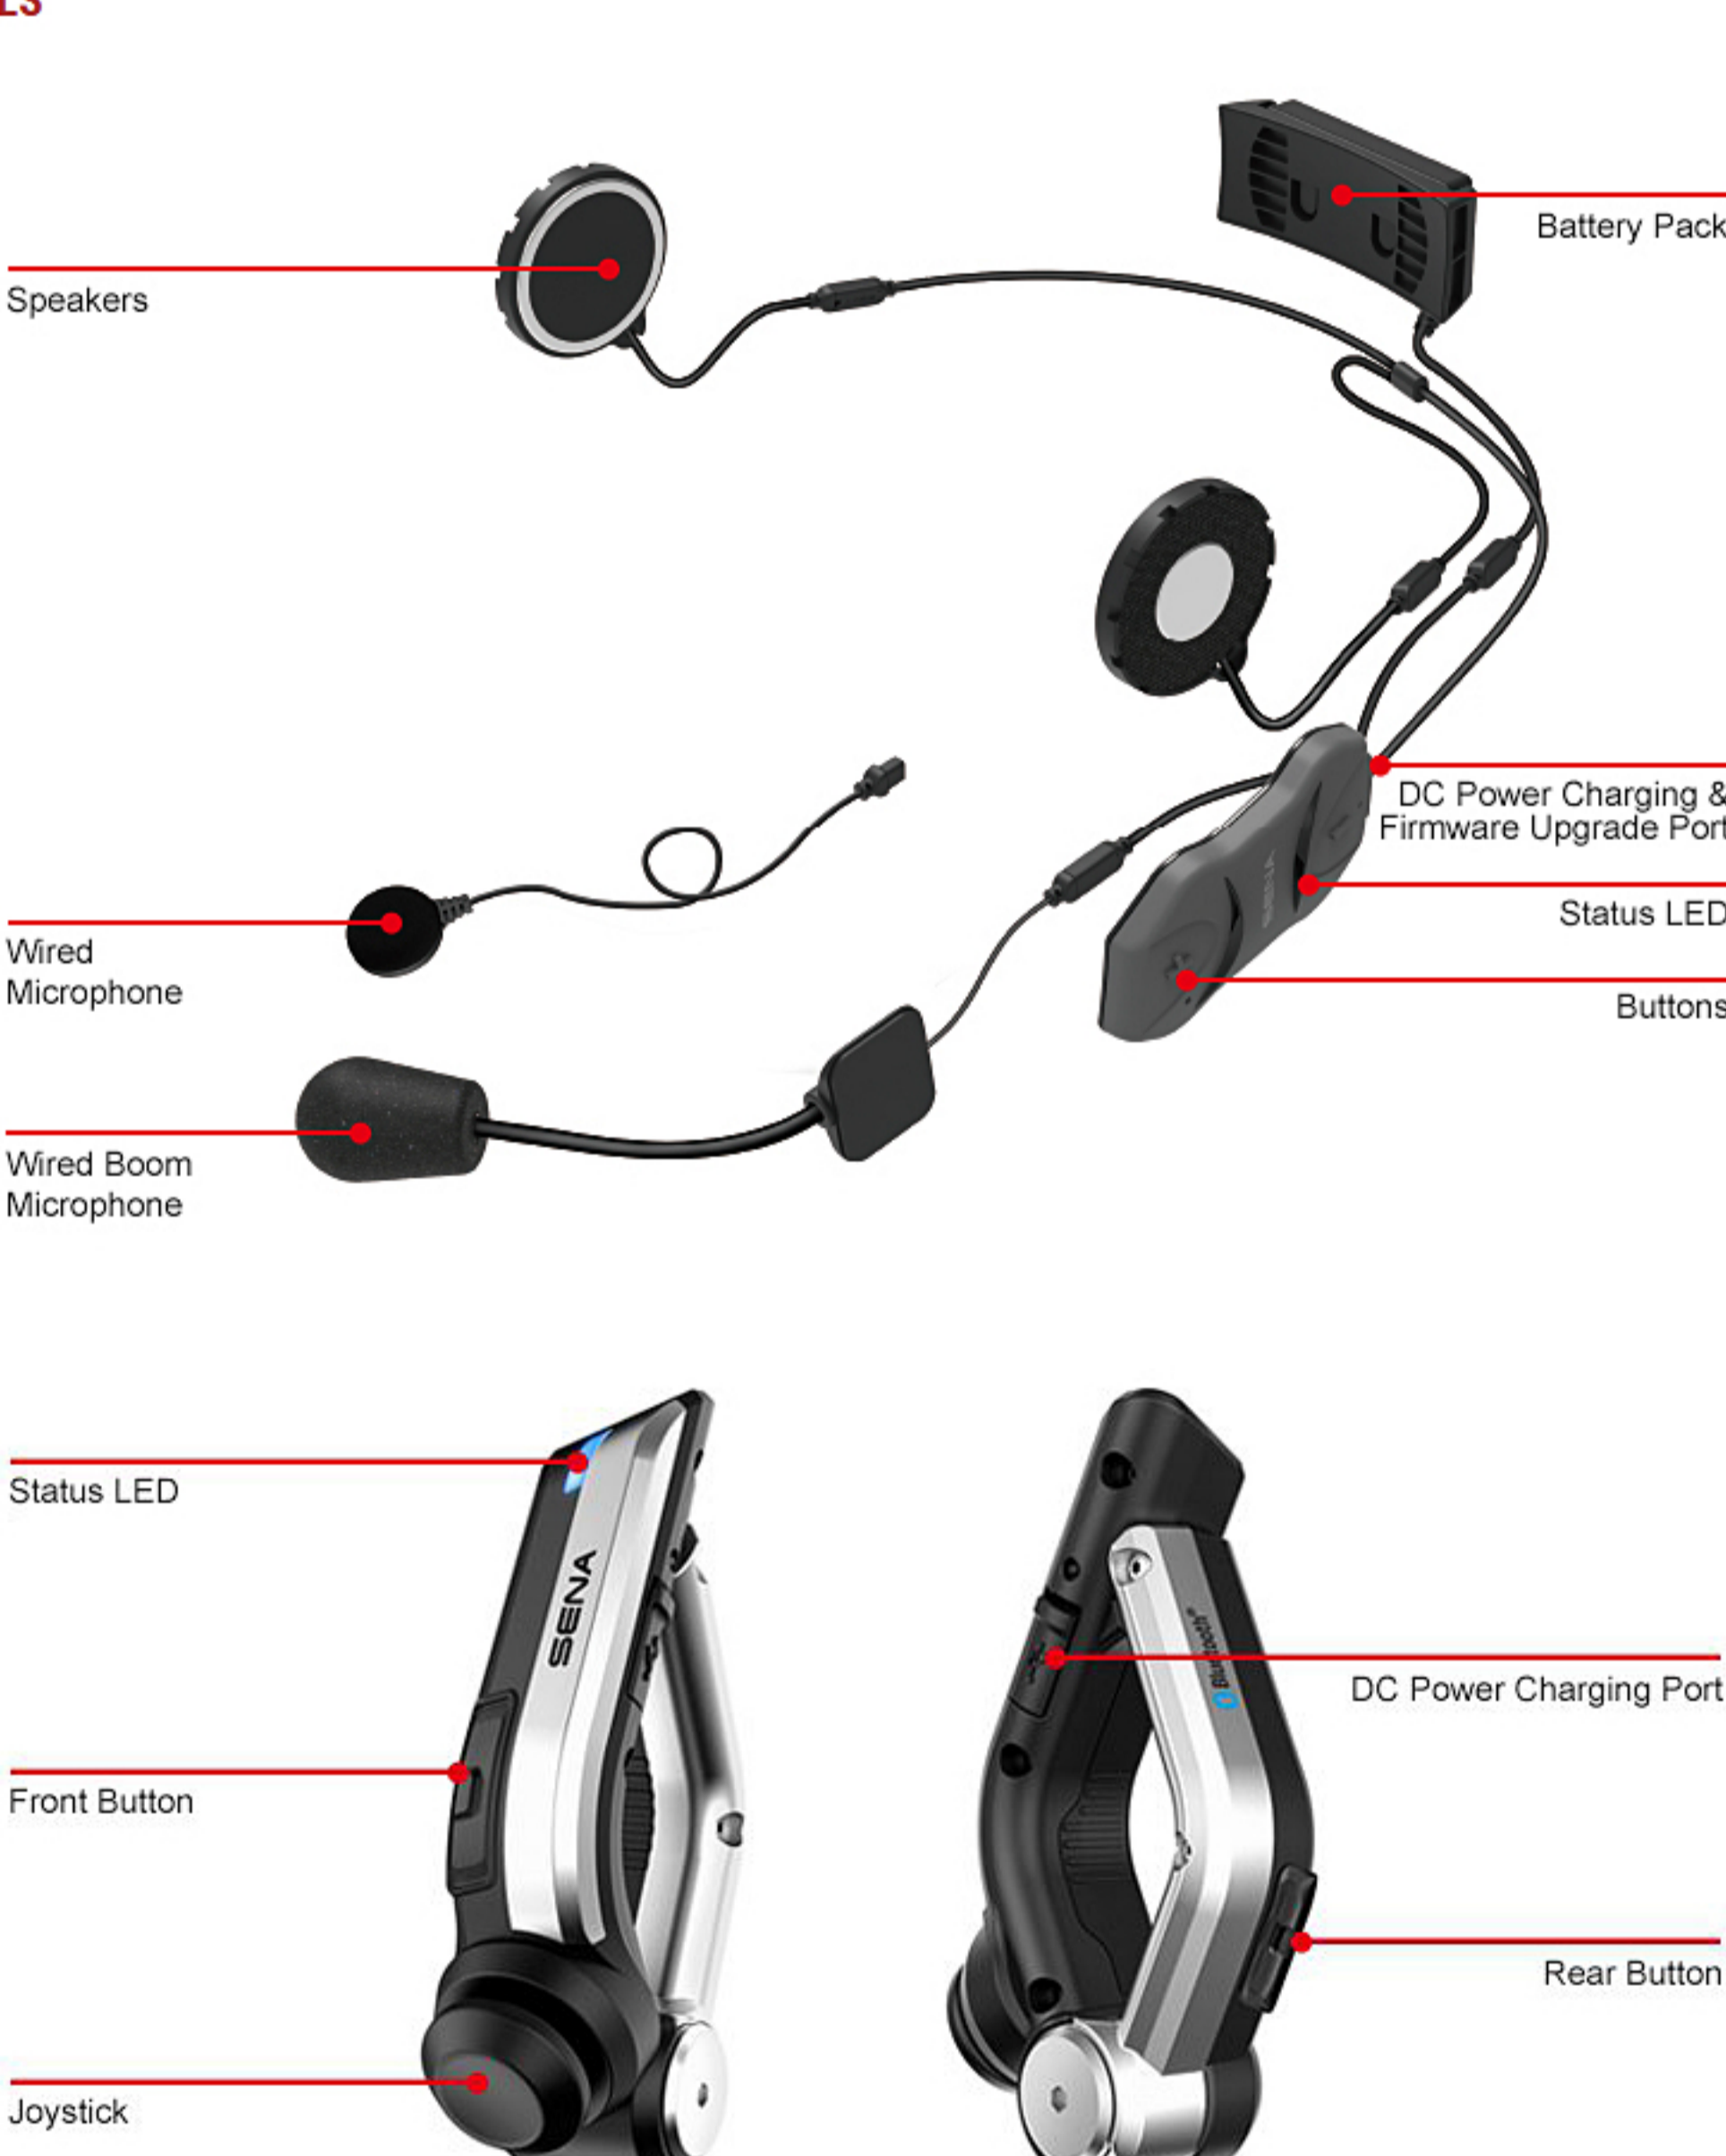

VERSATILE CONNECTIVITY MAKES FOR VERSATILE CAPABILITIES

Stay connected and in control with the Sena Headset App

Linking up your 10R with the Sena Headset App (for Android or iPhone) allows you to configure device settings, set groups of intercom friends, and access an interactive quick start guide. The 10R also offers the ability to pair with up to two mobile phones for convenient hands-free calling.
