

10UPAD

MOTORCYCLE BLUETOOTH® COMMUNICATION CHEEK PAD SYSTEM

A completely undetectable and easy to install Bluetooth 4.1 communication system so you can ride connected with Sena while staying true to your style.

THE COMPLETE SOLUTION, CUSTOM TO YOUR HELMET

INSTALLED IN A SNAP AND EASY TO USE

HIGH FUNCTIONALITY, LOW VISIBILITY

Bluetooth 4.1 functionality without sacrificing style

The 10UPad is available in 3 different models for the HJC IS-17 and HJC IS-MAX2 helmets (Sizes S-XL). It offers all of the functionality of a Sena Bluetooth headset, but is completely invisible from the outside of the helmet. Take and make phone calls, listen to GPS navigation, stream and share music, talk to other riders through 4-way intercom and more all through the 10UPad. An impressive 10 hours of talk time allows for more freedom on the road.

SNAP IN THE 10UPAD AND YOU'RE READY TO RIDE

Designed with simple installation in mind

Created with integrated unibody design, the 10UPad can be installed into your helmet with ease, creating an integrated HJC IS-17 and HJC IS-MAX2 headset. Simply snap in the right and left cheek pads and you're ready to ride. The tri-button control is located at the lower part of the left cheek pad for easy access while riding. No longer will speakers and a microphone have to be installed into the helmet, simply place the cheek pads inside of your helmet and you're good to go.

CONVENIENT AND CUSTOMIZABLE CONTROL

Less interruptions to your ride

For a more comfortable riding experience for your individual style, you can control your headset wherever and however best suits you. Control the 10UPad from your wrist, your handlebars, the body of your motorcycle, or any other way you can imagine. Place the control where you prefer to easily see and access it with any accessory from our extensive line of optional remote controls. The 10UPad is compatible with all Sena headset accessories including our Handlebar Remote, Wristband Remote, RC3, and RC4.

CONNECT IN MORE WAYS THAN EVER BEFORE

You're in control with Sena Smartphone Applications

Linking the 10UPad with the Sena Headset App (for iPhone and Android) allows you to configure device settings and access our quick guide at the click of a button. The 10UPad can also easily connect to the Sena RideConnected App to intercom with a virtually limitless amount of riders over an infinite range, so long as you are connected to a mobile network.
