

### BLUETOOTH® HEADSET & INTERCOM FOR SCOOTERS & MOTORCYCLES

The simple solution for superior motorcycle helmet communication. The 3S delivers outstanding incoming and outgoing audio performance with riding companions up to 200 meters (220 yards) away.

## SUPERIOR PERFORMANCE, SIMPLE DESIGN

A VERSATILE SOLUTION FOR HELMET COMMUNICATION

### EXCEPTIONAL AUDIO QUALITY, EVERY TIME

**Delivers outstanding audio performance up to 200 meters (220 yards) away**

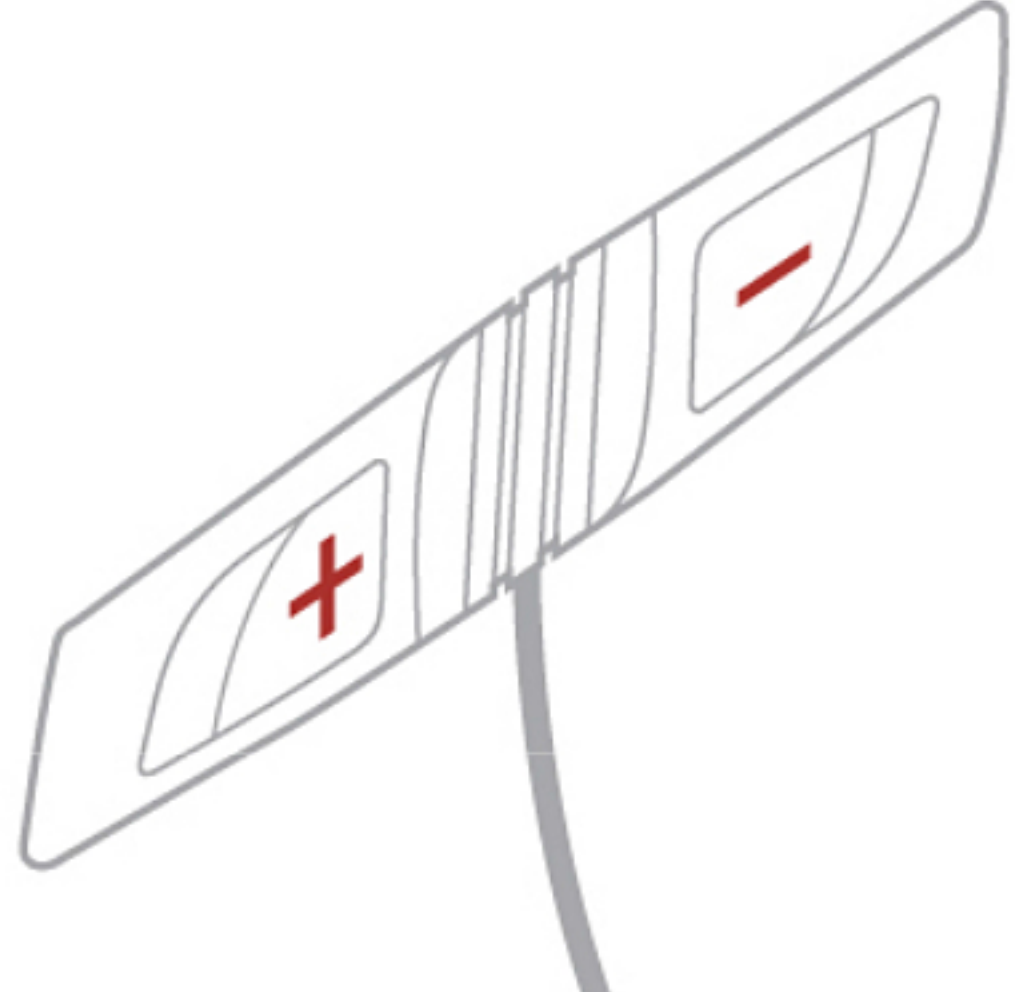

Bluetooth® 3.0 advanced signal processing enables the 3S to deliver outstanding incoming and outgoing audio performance for music, phone calls, GPS directions, and intercom conversations with riding companions up to 200 meters (220 yards) away. The 3S functions perfectly as an integrated scooter headset. Whether you use the 3S for communicating on your commute, or listening to music this scooter Bluetooth headset is extremely user friendly.

### QUICK INSTALLATION. TWO-BUTTON CONTROL

**Unique unibody design and easy to use**

Unibody design integrates all the components—main unit, control panel, speakers, and microphone—into a single piece, which makes installation a snap. Choose between a boom or wired mic set up with easy two-button controls, that make it easy to adjust settings on the fly and play, pause, track forward and track back your music. Also, each audio source has its own independent volume level you can adjust to your liking.

### GREAT SOUND. IN ANY ENVIRONMENT

**Boosts crystal-clear audio with noise-blocking technology**

Motorcycles aren't the quietest vehicles on the road. That's why we built the 3S to boost and deliver crystal-clear audio through the Bluetooth® stereo headset while employing noise-blocking technology that reduces engine, wind, and street noise. You'll get up to eight hours of talk time on a single charge and seven days of stand-by time. In addition to motorcycles, the 3S is a perfect headset for scooters.

### EASY, ALWAYS OPTIMIZED OPERATION

**Stay up-to-date with free firmware upgrades**

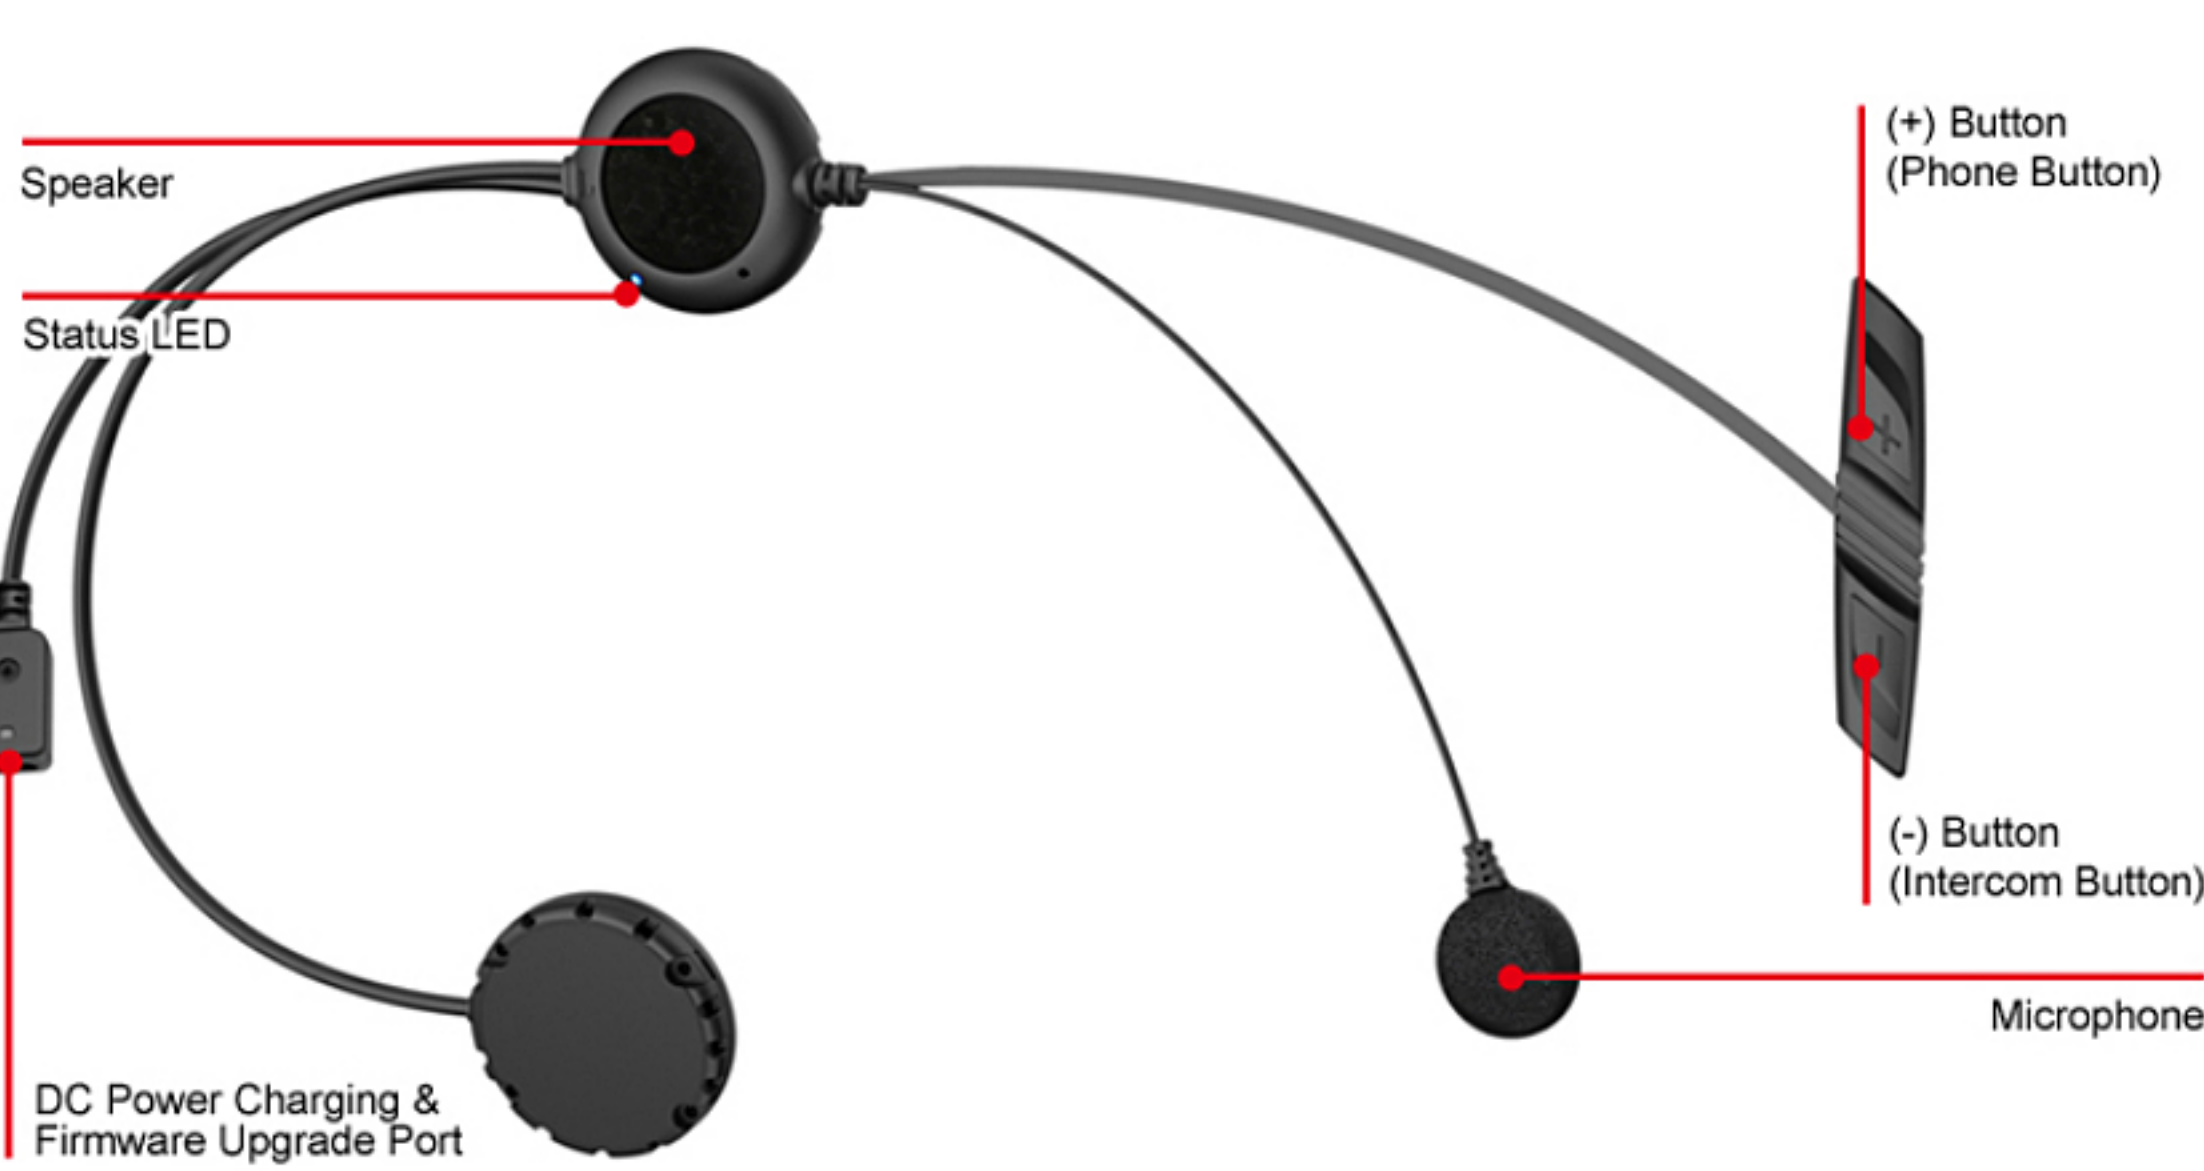

All registered Sena owners get access to free firmware upgrades, which ensure your 3S is always operating at peak performance. Meanwhile, integrated voice prompts (available English, French, German, Italian, and Spanish) help riders quickly learn their way around the device.
