1. ABOUT THE CAVALRY LITE BLUETOOTH HALF HELMET

1.1 General Information

This product is a motorcycle helmet.

Do not use it for any other purpose than riding a motorcycle. If you use the helmet for anything else, it may not provide sufficient protection in an accident.

No helmet can protect the wearer against all possible impact scenarios.

For maximum protection, the Sena Cavalry Lite Bluetooth Half Helmet must fit properly on the head and its retention strap securely fastened under the chin. With the retention system comfortably but firmly adjusted, the helmet should allow sufficient peripheral vision when secured. If the helmet is too large, it may move on your head while riding. If the helmet can be moved when pulled from the back in an upward and forward direction, it's not fitted properly. This could cause the helmet to obstruct your vision while riding or come off in an accident, resulting in personal injury or death. Please refer to **Section 1.3: "Wearing the Helmet"** for more details about properly securing and wearing your helmet.

The contents of this Sena Cavalry Lite Bluetooth Half Helmet User's Guide are subject to change without notice. Its illustrations may differ from the actual product. The copyrights for the User's Guide belong to Sena Technologies, Inc. Reproduction or copying of the User's Guide without permission is strictly prohibited.

Product Details

Wearing the Helmet

Pre-Ride Helmet Inspection

Accessory Installation: Ear Plates

Accessory Installation: Ear Pads

1.3 Wearing the Helmet

1.3.1 Putting on the Helmet

1. Unfasten the chinstrap.
2. Gently pull the padded V-straps outward and slide the helmet onto your head.

Note: A “chinstrap” is the nylon webbing that goes through the D-Rings.

3. Route the chinstrap under your chin, then thread it through both D-Rings.
4. To fasten securely, thread chinstrap back through the D-Ring closest to your neck, and pull.

Note: Check the chinstrap’s position and tension regularly to ensure proper fit.

1.3.2 Removing the Helmet

1. Loosen the chinstrap by pulling the red tab attached to the D-Rings.
2. Pull the chinstrap out from within the D-Rings.
3. Gently pull the padded V-straps outward and slide the helmet off your head.

Advice: Fastening the chinstrap after removing the helmet will help avoid scratching surfaces it’s placed upon.

1. ABOUT THE CAVALRY LITE BLUETOOTH HALF HELMET

1.4 Pre-Ride Helmet Inspection

1.4.1 Checking the Exterior

Check the helmet regularly for damage. Small, superficial scratches will not impair the helmet's protective qualities. In the case of more serious damage (cracks, dents, flaking and cracking paint, etc.), the helmet should no longer be used.

1.4.2 Checking the Chinstrap

1. Ensure that the chinstrap is properly routed under your chin.
2. To test chinstrap tension, slip your index finger under the chinstrap and pull. If the chinstrap is loose under the chin, it needs to be tightened. If the chinstrap loosens when you pull on it, the helmet is not properly fitted. Undo the chinstrap completely and try fastening it again, then repeat the test.
3. If you are unable to fasten the chinstrap so that it fits firmly against the chin, check that your helmet is still the right size for you.

Note: Repeat the test after each adjustment.

Caution: Never ride with the chinstrap unfastened or incorrectly adjusted. The chinstrap should fit correctly and should not become loose when pulled. The fastener is not correctly closed if the chinstrap becomes loose when pulled.

1.5 Accessory Installation: Ear Plates

To amplify the sound from the speakers, you can use the ear plates. Slide in the included ear plates on both sides of the helmet. Make sure they are aligned with your ears.

Ear Plates

- Volume Adjustment
- Downloadable Sena Software
- Configuration Menu

2.2 Powering On and Off

Press and hold the **Center Button** and the **(+) Button** at the same time for **1 second** to turn the headset on or off.

Powering On

Powering Off

2. GETTING STARTED: BUILT-IN BLUETOOTH SYSTEM

2.3 Charging

The **Bluetooth Communication Module** can be charged using many common methods via the supplied USB power & data cable:

1. Plugged into a computer's USB port
2. With a USB-equipped AC adapter via a wall-outlet charger

Note:

- Please make sure to take off your helmet while charging. The headset automatically turns off during charging.
- Any 3rd party USB charger can be used with Sena products if the charger is approved by either the FCC, CE, IC or other locally approved agencies that Sena accepts.

2.4 Checking the Bluetooth Module's Battery Level

There are two ways to check battery level:

1. Visually, with LEDs when powering on.

Battery Level — Visual Method

Note: Blinking LEDs alternate from blue to red when battery power is low.

2. Audible method: Press and hold the **Center Button** and the **(+) Button** for **3 more seconds** as the headset powers on. A prompt will announce the remaining battery level.

2.6 Downloadable Sena Software

2.6.1 Sena Device Manager

The **Sena Device Manager** allows you to upgrade the **Bluetooth Communication Module's** firmware and configure its settings directly from your PC or Apple computer. Using this software, you can assign speed dial presets, FM radio station presets and more.

2.6.2 Sena Smartphone App

The **Sena Smartphone App** allows you to configure the **Bluetooth Communication Module's** settings, as well as access the User's and Quick Start Guides. To do so, pair your mobile phone with your **Cavalry Lite Bluetooth Half Helmet** (please refer to **Section 3: "Pairing the Helmet with other Bluetooth Devices"** for more details). Run the **Sena Smartphone App** and configure the settings directly from your smartphone. You can download the **Sena Smartphone App** for Android and Apple operating systems.

3. PAIRING THE HELMET WITH OTHER BLUETOOTH DEVICES

Mobile Phone

Additional Mobile Phones, GPS, MP3 Player or Sena SR10 Two-Way Radio Adapter

Advanced Selective Pairing: Hands-Free or A2DP Stereo

Before using Cavalry Lite’s Bluetooth system with other Bluetooth devices for the first time, they’ll need to be “paired.” This enables them to recognize and communicate with one another whenever they’re within range.

The helmet’s Bluetooth Module can pair with multiple Bluetooth devices such as a mobile phone, GPS, MP3 player or Sena SR10 Two-Way Radio Adapter via **Mobile Phone Pairing** and **Second Mobile Phone Pairing**.

7.6 Region Selection (Default: Worldwide)

You can select the proper FM frequency range for your location from the **Sena Device Manager** or the **Sena Smartphone App**. Using the region setting, you can optimize the seek function to avoid unnecessary frequency ranges.

Region	Frequency range	Step
Worldwide	76.0 ~ 108.0 MHz	± 100 kHz
North America, South America and Australia	87.5 ~ 107.9 MHz	± 200 kHz
Asia and Europe	87.5 ~ 108.0 MHz	± 100 kHz
Japan	76.0 ~ 95.0 MHz	± 100 kHz

7.7 Radio Data System (RDS) Alternative Frequency (AF) Setting (Default: Enable)

The **RDS AF** setting can be found in the **Configuration Menu**. Please refer to **Section 2.7: “Configuration Menu”** for more details.

When radio station signals get too weak for good reception, with **RDS AF** enabled, the Sena radio receiver re-tunes to a station with better reception. If **RDS AF** is disabled, you’ll have to find stronger stations manually.

- FM Radio On/Off
- Seek and Save Radio Stations
- Scan and Save Radio Stations
- Temporary Station Preset
- Navigating Preset Stations
- Region Selection
- Radio Data System (RDS) Alternative Frequency (AF)

7. USING THE FM RADIO

Access RDS AF Setting in the Configuration Menu

8. GENERAL SETTINGS

8.1 Function Priority

The headset prioritizes connected devices in the following order:

- (highest)** Mobile phone
- Intercom
- Music sharing via Bluetooth stereo
- FM radio
- (lowest)** Bluetooth stereo music

A lower-priority function gets interrupted by a higher-priority function. For example, stereo music will be interrupted by an **Intercom Conversation**; an **Intercom Conversation** will be interrupted by an incoming mobile phone call.

8.2 Firmware Upgrades

The Cavalry Lite Bluetooth Half Helmet supports firmware upgrades. You can upgrade the firmware using the **Sena Device Manager**.

8.3 Voice Prompts

A **Voice prompt** setting can be found in the **Configuration Menu**.

If **Voice prompt** is enabled, you can hear **Voice prompts** for different kinds of features. If **Voice prompt** is disabled, **Voice prompts** are silenced except for those in the Configuration Menu, battery level indication, speed dial, and FM radio functions.

Pairing with the Remote Control

9. REMOTE CONTROL

You can remotely control the Bluetooth Module using Sena Remote Control devices (sold separately) such as a Handlebar Remote or a Wristband Remote. This eliminates the need to remove your hands from the handlebars for button operations.

9.1 Pairing with the Remote Control

- 1. Turn on the Bluetooth Module and the Remote Control device.
- 2. Execute **Remote Control Pairing** in the **Configuration Menu**. Please refer to **Section 2.7: "Configuration Menu"** for more details.

Fault Reset

Factory Reset

10. TROUBLESHOOTING

This detailed online FAQ section deals with troubleshooting, illustrates case studies and contains tips on using the **Sena Cavalry Lite Bluetooth Half Helmet**.

10.1 Fault Reset

When the helmet's Bluetooth Module is not working properly, you can easily reset the unit:

1. Locate the pinhole reset button below the **(+) Button**.
2. Gently insert a paper clip into the hole and press the **Fault Reset Button** for **1 second** with light pressure.

Fault Reset

=

3. The communication module will shut down.

Note: Fault Reset will not restore the Bluetooth Module to factory default settings.

Fault Reset

Factory Reset

10.2 Factory Reset

To erase all of your settings and start fresh, the headset can be restored to factory default settings using the **Factory Reset** feature in the **Configuration Menu**. Please refer to **Section 2.7: "Configuration Menu"** for more details.

Access Factory Reset in the Configuration Menu

11. MAINTENANCE AND CARE

11.1 Outer Shell

Use a soft cloth and a small amount of water to remove bugs from the exterior.

Note: Never use gasoline, diesel fuel, thinners or solvents to clean the helmet. These substances can cause serious damage to the helmet, even though the resulting damage may not be visible. The full safety function of the helmet can then no longer be guaranteed.

11.2 Inner Lining

The inner lining of the **Sena Cavalry Lite Bluetooth Half Helmet** is completely removable. Its headliner can be washed by hand using mild soap at a maximum temperature of 30°C (86°F). Allow the lining to dry at room temperature.

11.3 Storing the Helmet

Store the helmet in a dry, dark, well-ventilated location, out of the reach of children and animals. Always position the helmet so that it cannot fall to the floor. Damage that occurs in this way is not covered by the warranty.
