

SR10

BLUETOOTH® TWO-WAY RADIO ADAPTER

The SR10 Two-way Radio Adapter allows you to talk wirelessly with two-way radio devices via Bluetooth® 2.1+EDR.

A VERSATILE ADDITION TO YOUR COMMUNICATIONS NETWORK

TALK WITH TWO-WAY RADIOS, ADD HANDS-FREE FUNCTIONALITY TO MOBILE PHONES

WIRED AND WIRELESS DEVICES, NOW CONTROLLED TOGETHER

Works with stereo or mono Bluetooth® headsets

The SR10 Two-way Radio Adapter allows you to talk wirelessly with two-way radio devices via Bluetooth® 2.1+EDR. It also provides a hands-free gateway for mobile phones and is compatible with standard stereo or mono Bluetooth® headsets.

HANDS-FREE, GRAB AND GO

Optional power and mount kits

The SR10 will clip onto your belt or mount onto handlebars with a wired PTT button extension for handlebar grip mounting. With the optional 12V bike-powered kit, you can install it to turn on and off with the motorcycle Ignition. It is also usable while charging.

VERSATILITY TO ENHANCE THE RIDE

Connect to non-Bluetooth technology

It also enables you to hook up non-Bluetooth devices such as radar detectors and GPS navigation via two AUX ports. The SR10 allows you to connect with up to two audio sources at the same time and works for a variety of applications, such as motorcycle group riding, outdoor sports and activities, and security.

Hands-Free Profile

SR10 only supports HFP (Hands-Free Profile) Bluetooth connection with a Bluetooth headset. HFP is a typical and standard Bluetooth headset connection which can only transmit mono audio. If a stereo audio device like a music player is connected to the SR10, audio quality will be diminished to mono audio. Thus, connecting a stereo audio device to the SR10 is not recommended.
