

NEW 3P SYSTEM

Exclusive Patented Fitting System

One of SHAD's most important innovations. The new 3P System side kit has been specifically created for this occasion, and while developing it, not only aesthetics were in mind. The key point to be considered was safety.

- **Integrated Design:** The 3P kit is much better integrated with the bike. The typical rectangular frame is reduced to a single arm which supports the three points (3P) needed to fix the side case.
- **Position:** Both the volume of the case and the angle of the 3P System have been designed to shift the luggage's weight as much as possible towards the bike's center of gravity. This grants higher security and stability when driving with full load.
- **Aerodynamic:** The use of 3 points confers firmness and flexibility at the same time. This is reflected on a slight swinging of the case, which lets the air to flow easily around it, avoiding the "anchor" effect of a typical flat and rigid case. Again, this results in better security and stability in motion.
- **Patented:** The uniqueness and innovation of the new 3P System allowed us to proceed with the patent registration. This makes us the only manufacturer that can offer this kind of fitting system.

* Incompatible with SH23 side cases

** Only compatible with SH23 side cases

VERSATILE AND WITH A LARGE LOAD CAPACITY

Ideal combination with the SH59X

The SH35 side cases are more aerodynamic and have a greater loading capacity than the big part of the aluminium cases of the market. With capacity for a jet helmet, the SH35 are rigid and light, thanks to its double structural frame, which provides better sealing and stiffness. In addition, they have an internal tray and elastic straps to fix the load and an inner bag can be perfectly added to transport load in a more comfortable way.

These side cases combine perfectly with the Expandable Top Case SH59X to create an aluminium set that provides maximum versatility, ideal for the urban day-to-day as well as for road trips or adventure tours through diverse terrains.

DISCOVER THE NEW SH23 BY SHAD

Lightness, elegance and functionality

Lightness, elegance and functionality. Our engineers have unified these three concepts, maintaining the demanding standards of resistance in a thin suitcase that allows an absolute mobility with the bike. Despite being lightweight, the SH23 are very resistant and can carry up to 5 kilos of maximum load. All the volume capacity of the suitcase is usable and the opening at the top allows the rider to access his belongings without getting off the bike.

The shape of the luggage provides great aerodynamics, improved by the 3P System integration. Our practically invisible fitting make the assembling and dismantling of the side cases easier. In addition, the SH23 have customizable covers in various colors (white, black or new titanium).

QUALITY, PROTECTION & MOBILITY

For urban and mid distance routes

Versatile and functional, these side cases are specially designed for urban or medium distance tours. They are perfect for those motorists that demand quality and protection for their belongings, with maximum mobility, whether to move around the city or to make weekend getaways.

INTERNATIONAL RED DOT DESIGN AWARD 2015 AND GERMAN DESIGN AWARD 2017

SH36 BECOME THE MOST PRIZE WINNING MOTOR CASES

At NAD SL we firmly believe that continuous improvement and the pursuit of excellence is the way forward to continue creating unique and quality products.

In 2015, this determination led us to win the Red Dot Award for the design of new side cases SH36, distinguished not only by an elegant aerodynamic design, but also by a well-conceived mounting system.

In 2017 (officially announced in October 2016) SH36 panniers have rendered themselves liable again for one of the most important international awards, the German Design Award, getting a special mention for its excellent design. Prizes are only granted to projects that truly represent pioneering contributions to the international design landscape.

Among these awards winners in previous editions, we find very prestigious products in their fields, such as different models of Audi, BMW, Mercedes, Jacob Jensen, Nespresso, LG, HP, Monster, Sennheiser, Yamaha MT09...

We feel very proud and want to thank and share this awards with all those who with your daily hard work have made SHAD become a leader in the industry.

CAPACITY FOR A MODULAR XXL HELMET

Unique in its Category

Capacity is one of the features that make this new side case absolutely different. Despite its compact design, we have optimized the volume maximizing space. This way, we meet one of the most popular wishes for our customers, allowing for a modular helmet size XXL.

But back to our engineers, they would not let this affect the behavior of the suitcase up and at full load. That is why they have developed a completely new Structural Framework. This framework makes this case waterproof. It includes a double profile and a pyramidal rubber edging within, thus becoming a maze for water, which is directed to the base, where the gutter efficiently drains it. In addition, the structural framework increases rigidity, allowing optimization of the materials used. As a result, the SH36 is the lightest of its market segment.

SH36 shows a remarkable aerodynamic shape, increasing the bike's security and stability. It also features exclusive details like the new reflector, resistant to dust, humidity and time, thanks to the use of new materials. These side cases feature different colors –white, black, new titanium, dark grey and the new carbon look- to perfectly fit with both bike and rider. Additionally, as an optional accessory, the reflector can be changed by a red one, not to miss any detail.

INNER BAG WITH SPECIFIC DESIGN

Compatible with the SH35 & SH36 side cases

This inner bag fits perfectly to the side bags SH35 and SH36. Use them for a more comfortable experience. You will be able to prepare the luggage or to take it with you without removing it from its Fitting kit.
