

**GAVIA GORE**

CE

The "CE" marking means that the product meets the basic health and safety requirements of European Directive 89/686/EEC.

<b>SIZE</b>	39 - 40 - 41 - 42 - 43 - 44 - 45 - 46 - 47 - 48 - 49 - 50
<b>UPPER</b>	Upper in Full Grain Microfibre
<b>LINING</b>	Lined with a Gore-Tex® waterproof-breathable membrane
<b>SOLE</b>	Non slip rubber sole

**COLOUR**

BLACKBLACK

**TECNOLOGY**

Hook and loop fastener and zip closure  
 Breathable textile bands  
 Full length inner gaiter  
 Soft padded Shin Plate  
 PU ankle pad  
 Internal ankle pad  
 Back reflective insert  
 Zipper elastic panel  
 Shift pad  
 Nylon inner sole and removable arch support pad

**ZIP ELASTIC PANEL**

-- Sidi has added a small elastic panel to aid in a smooth zipper operation as it allows a bit of movement via the elastic as the zipper passes over the rider's ankle ball.

Full Grain Microfibre with very similar characteristics to the genuine leather. Full Grain microfibre is not affected by aging and all its features are meant to be long-lasting. Lighter of leather it has very high mechanical properties outstanding tensile strength, tear resistance and flexing endurance. It maintains its softness independently from the exposition to every temperature. Full Grain Microfibre is stabil, breathable and water repellent. More resistant than leather.

The GORE-TEX® membrane is at the heart of all products engineered with GORE-TEX® fabrics. It contains over 1.4 billion microscopic pores per square cm (9 billion pores per square inch). These pores are 20,000 times smaller than a water droplet, but 700 times larger than a water vapor molecule. Water from the outside will never penetrate. Yet perspiration can escape easily, so that less moisture is trapped in the insulation. The result: you stay warmer when it's cold and drier when you perspire.
