

S T AIR

CE

The "CE" marking means that the product meets the basic health and safety requirements of European Directive 89/686/EEC.

SIZE	37-38-39-40-41-42-43-44-45-46-47-48-49-50
UPPER	Perforated TECHNOMICRO Microfibre
LINING	Lined with air Teflon mesh
SOLE	Top Rubber sole

COLOUR

BLACK | BLACK

TECNOLOGY

REPLACEABLE SHIN PLATE

.. The shin plate is made in nylon and it is inserted on a polyurethane frontal support. Both parts are replaceable.

REPLACEABLE ST 10 BUCKLE AND STRAP

.. This closure system adjust to the leg circumference on both sides therefore increasing the opening of the boot for ease of putting on.

ANKLE SUPPORT BRACES

..The two nylon braces join the ankle joint with two screws that are hidden by a nylon cap. This system supports the ankle and is reinforced with fiberglass and is easy to replace. This system allows excellent flex movement front-to-back while being firm side-to-side.

AIR VENTILATION SYSTEM

..On the outer lower part of the boot an air intake is fitted which can be operated by an aerodynamic shaped button.

The toe slider is made in nylon reinforced with fiberglass. It is fitted with a new air intake and an innovative alloy insert

When constructing most of Sidi boots, Sidi uses a new generation material called "Technomicro". Technomicro is a composite microfibre material created from strands that are so fine, each one is less than one thousand the thickness of silk. These fibers act like natural leather skin, but with the advantage of better strength, softer texture and lighter weight. Technomicro is also water resistant, highly resistant to abrasion and tearing and is easy to clean and maintain. Technomicro doesn't stain and offers reduced weight, more flexibility and a better feel than leather or other synthetic material boots

ZIP ELASTIC PANEL

.. Sidi has added a small elastic panel to aid in a smooth zipper operation as it allows a bit of movement via the elastic as the zipper passes over the rider's ankle ball.

SHOCK ABSORBING HEEL CUP

.. A polyurethane shell holds a shock absorbing insert, visible from the outside through small slits that mark out the look of the heel. The shell is mobile as it is fixed to the boot by two screws that allow 3 mm of impact movement.

REPLACEABLE SLIDER

.. The slider is replaceable and available in full nylon, with ceramic or with aluminium inserts.
