

Technical Specs

A3 for ATV, Watercraft and Snowmobiles

Spider A3 Grips feature Traction Gel - a specifically formulated compound that sheds mud and water so that it stays tacky, even when wet, making it easier to hold on. This design gives better control and less rider fatigue. Just like a competition tire, Traction Gel breaks in and continues to offer top performance throughout the life of the grip.

The flangeless A3's taller pattern sheds water and mud.

The dual layer design dampens out vibration for riders using thumb throttles.

The super tough closed end keeps water and mud out.

A3's are available in Black, Grey, Blue, Red and Yellow.

A3 Applications: ATV, Watercraft, Snowmobiles.

A3 ATV grip for 7/8 handlebar with NO Throttle Tube: 132mm Long x 30.5mm Outside Diameter.
