## Spider Slim Peak Grip

The new Spider Peak Grip is designed for performance road & sport touring riders. Our goal was to design a performance grip that is more than just a replacement for stock OE grips. The Spider Peak was conceived, designed, tested and endurance proven by our Spider Grips Design team

**Aggressive Tread Pattern:** creates a more secure bond between rider and motorcycle, increasing comfort and tactical feedback.

**Tapered Shape:** Slim at the inside for maximum performance and thicker at the outside end where a harmonic damper reduces vibration and numbness for relaxed long distance riding.

**Traction Gel:** Softer outer layer sheds water, increases gripping power and reduces fatigue for greater comfort over the long haul.

Now Available in Black, Red and Gray

**PEAK Sport Bike grip for 7/8 handlebar with 1 inch Throttle Tube: 125mm x 31.5 Outside Diameter.**

Discover other motorcycle handlebars & controls on our website.
