

Spider Slim Line SLR

Thin and precise, this dual layer grip is perfect for Sport, Road and Motard riders. Gel layers dampen vibration and provide great traction. A narrow flange and open end make the SLR easy to mount even with bar ends or hand guards.

Colors

These grips are available in 10 colors. Black, Pink, Green, Graphite, Blue, Titanium, Yellow, Black, Orange, Red

Vibration Dampening Core

Thin and precise, this dual layer grip is perfect for Competition, Sport, Road and Super Moto riders. Spider SLR grips are designed with a Vibration Dampening Core. This Acoustical Rebound Layer is engineered with your riding in mind. Spider's grip design has a specially shaped core with an innovative boundary layer. This gives you a grip with less vibration at the hand which reduces hand fatigue and arm pump, and also lets you listen to feedback from the machine and tailor your response accordingly.

Traction Gel

Spider SLR grips feature Traction Gel - a specially formulated compound that sheds mud and water so that it stays tacky even when wet making it easier to hold on. This gives better control and less rider fatigue. Just like a competition tire, Traction Gel breaks in and continues to offer top performance throughout the life of the grip.

Dual Gel Layers

Dual Gel layers dampen vibration and provide great traction.

Narrow Flange, Open End - Easy to Mount

A narrow flange and open end make the SLR easy to mount even with bar ends or hand guards.

Colors

The SLR grips are available in 10 colors. Red, Orange, Graphite, Yellow, Titanium, Blue, Black w/Graphite, Green, Pink, and our only All Black Motorcycle grip.

SLR Applications

SLR Applications: Track, Sport Bike, Road Riding and SuperMoto

Remember; always check your controls to be sure they are free and correct before every ride, and to seek a professional's advice on any modification to your machine.

Spider Grips are in compliance with CPSC Standards, and the Consumer Product Safety Act of 2008
