

## Technical Specs

# Slim Line SLR for Track, Sport, Road and Super Moto

Thin and precise, this dual layer grip is perfect for Competition, Sport, Road and Super Moto riders. Spider SLR grips are designed with a Vibration Damping Core. This Acoustical Rebound Layer is engineered with your riding in mind. Spider's grip design has a specially shaped core with an innovative boundary layer. This gives you a grip with less vibration at the hand which reduces hand fatigue and arm pump, and also lets you listen to feedback from the machine and tailor your response accordingly.

Spider SLR grips feature Traction Gel - a specifically formulated compound that sheds mud and water so that it stays tacky even when wet making it easier to hold on. This gives better control and less rider fatigue. Just like a competition tire, Traction Gel breaks in and continues to offer top performance throughout the life of the grip.

Dual Gel layers dampen vibration and provide great traction.

A narrow flange and open end make the SLR easy to mount even with bar ends or hand guards.

SLR Sport Bike grip for 7/8 handlebar with 1 inch Throttle Tube: 120mm Long x 29.0mm Outside Diameter

Dual Gel layers dampen vibration and provide great traction.

The SLR grips are available in 10 colors. Red, Orange, Graphite, Yellow, Titanium, Blue, Black with Graphite, Green, Pink and our only All Black Motorcycle grip

SLR Applications: Track, Sport Bike, Road Racing and SuperMoto
