

## FREQUENTLY ASKED QUESTIONS

STOMPGRIP Beauty Image featuring ICON profile

### **Will the same kits work for both Boardsports and Powersports?**

The answer is NO, our products are produced specifically per sport with correct durometer materials and adhesives per application.

### **What if there is not a kit offered for my specific bike?**

We offer Universal Streetbike Kits in both Volcano and Smoothridge profiles that will fit most any bike.

In addition we have All-Purpose Kits for most Powersport applications in multiple shapes and sizes along with Sheets, Strips and Frame Rails that can be used off the shelf or cut to fit.

### **Can Stompgrip products be removed and reapplied?**

Our kits are built with the strongest 3M adhesives, designed with a one-time use.

We don't recommend reapplication with other adhesives once they've been removed.

### **Can the kits go bad?**

All Stompgrip products are produced fresh and come with a born on date stamped on the back of the original packaging.

Our packaged products are produced with adhesives having a shelf life which guarantees them up to 1 year from the born on date stamp.

Stompgrip Traction is also designed to wear similar to the tires on your vehicle, we recommend reapplication of Stompgrip as needed to maintain Traction.
