TANK GRIPS

Tank Grips

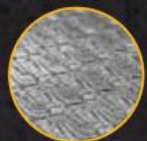

Benefits of Tank Grips

- Increase overall control of the vehicle by locking knees to tanks.
- Improve confidence in corners by eliminating the risk of slippage.
- Reduce arm pump and fatigue by relieving pressure on wrists and forearms.
- Prevent sliding on the seat under acceleration.
- Assist in maintaining a stable body position.
- Stop riders and passengers from sliding forward when braking (i.e., no nutcracker experience).

STOMPGRIP Features

- Available in clear or black.
- Available in multiple traction profiles for different riding needs.
- Rounded edges to avoid snags and peeling.
- Custom designed and specifically molded for power sports vehicles.
- Manufactured with highest quality 3M adhesives and proprietary plastic blend.
- Made in the U.S.A.

STOMPGRIP Traction Profiles

ICON

The least aggressive grip with a sleek profile designed from Stompgrip's logo. A less intimidating grip for the everyday rider who wants to increase control over their vehicle. Great for adventure bikes and café racers.

VOLCANO

An aggressive grip with a short peak and caldera profile. The true original. Beneficial for all riders in all conditions whether on the street, in the dirt or the snow.

SUPER VOLCANO

A very aggressive grip with a tall, pointed peak profile. Developed in conjunction with California Superbike School for sport bike racers and track day riders.

QUAD PLATE

The most aggressive grip with a tiered, scooped profile (like a mini skate ramp). Excellent for under-foot traction or use on snowmobile tunnels and consoles in winter conditions.

Sport Bike: Racing

Sport bikes are optimized for speed, acceleration, braking and cornering on paved roads. Stompgrip created its tank grips with these characteristics in mind to enhance each rider's abilities and overall performance.

Regardless of what class a racer is competing in, from amateurs to World Superbike Champions, Stompgrip tank grips will aid in improving their performance. The fastest and least expensive method to increase speed and ability while cutting down lap times is to increase control with Stompgrip tank grips.

Sport bike racers can choose from volcano, super volcano and icon traction profiles based on how much they prefer to lock in or slide on the tank when racing. These different levels of grip provide each racer with options to meet their individual riding style and needs while chasing the checkered flag.

Sport Bike: Track Days & Riding Schools

The track day community is a large, diverse group of riders from all backgrounds. Attending a track day is a great way to meet people who share the same passion for riding motorcycles fast. There are also many riding schools that offer private class track days that provide excellent introductions into the sport bike riding experience.

Stompgrip tank grips are the ideal accessory for track days regardless of a rider's proficiency or riding level. They improve confidence in new and experienced riders by increasing overall control of the motorcycle and reducing slippage in corners and when braking.

Track day riders can choose from volcano, super volcano and icon traction profiles based on how much they prefer to lock in or move around on the tank when riding. Volcano and super volcano are the preferred profiles used by schools that Stompgrip sponsors, like California Superbike School.

Sport Bike & Naked Bike: Every Day Riders

The everyday sport bike or naked bike rider faces many challenges in their riding environments, whether riding down a winding canyon road or simply commuting to work and navigating through traffic.

StompGrip's tank grips help to overcome many daily issues that riders face; sudden stops and needing to hit the brakes hard without going over the bars, better control and safety in high traffic situations and reducing fatigue during longer commutes.

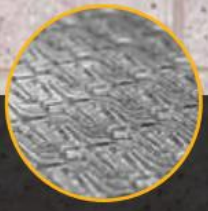

Everyday riders can choose from volcano and icon traction profiles based on aesthetics and their individual riding style. Super volcano is also an option, but not as commonly used for daily riders.

Dual Sport / Adventure Bike

Dual Sport or Adventure bikes are the bikes that can do it all; they combine the ruggedness of a dirt bike with the elegance of a cruiser. Riders enjoy the liberty and versatility of cruising the streets to desert trails and backcountry roads then home again. These bikes offer true freedom.

Regardless of the terrain, Stompgrip has tank grips to give the Dual Sport rider more control and confidence riding in diverse environments. Stompgrip also helps to reduce fatigue on longer adventures.

Dual Sport riders can choose from icon and volcano traction profiles based on aesthetics and their individual riding needs.

Cruiser & Café Racer

Cruiser riders tend to enjoy a more relaxed ride, but are not afraid to open up the throttle! In a similar vein, café racers are built for speed and handling yet are also being used as daily transportation. A resurgence in café racer popularity has a new generation cruising the streets.

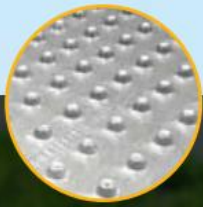

Stompgrip's tank grips help to overcome many daily issues that riders face; sudden stops and needing to hit the brakes hard without going over the bars, better control, and safety in high traffic situations and reducing fatigue during longer rides.

Riders can choose from icon and volcano traction profiles based on aesthetics and their individual riding needs. Stompgrip created the Universal Rally, Sprint and High Boy tank grips from stock Café Racer tank dimensions to provide tank grip alternatives for this special class of bikes.

Touring

Touring motorcycles are optimized for long-range travel and involve extra equipment such as larger windshields and fairings for wind protection and luggage racks or saddlebags. Touring bike riders tend to make epic journeys on two-wheels, feeling engaged with their surroundings.

Stompgrip's tank grips help touring riders overcome fatigue on the long stretches of their adventures. They also assist with sudden, unexpected stops and by providing better control and safety in the widely varied situations that touring riders encounter on their journeys.

Riders can choose from icon and volcano traction profiles based on aesthetics and their individual riding needs.

Dirt Bike: Offroad

There are various types of Dirt Bikes, or “offroad” bikes, used outdoors: the two primary types of dirt bikes are motocross and enduro. The setups for both of these types of dirt bikes are often customized for different activities such as supercross, racing, trail riding and desert riding. They all share common traits of using knobby tires and being built to withstand the most severe and rugged conditions.

Regardless of the terrain or outdoor challenge, Stompgrip’s tank grips give Dirt Bike riders more control and confidence riding in diverse environments. Stompgrip also helps to reduce arm pump and fatigue on longer trail rides or during extended, grueling races.

Offroad riders can choose from Stompgrip’s bike specific volcano tank grips or use the Universal Volcano Sheet to cut pieces to fit where they need grip. The Universal Mini Strips also function well as frame rails.

Dirt Bike: Freestyle

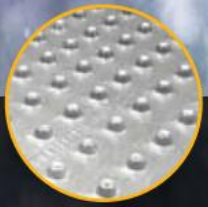

Freestyle riders execute tricks at extreme levels performing jumps and stunts at events such as X-Games and Nitro Circus. These daredevils are out to push the limits every time they ride.

Stompgrip aids freestyle riders by providing extra grip wherever a rider needs it to pull off the most extreme tricks. It gives them the extra control they need while eliminating the risk of slippage during performances.

Snowmobile: Snocross & Freestyle

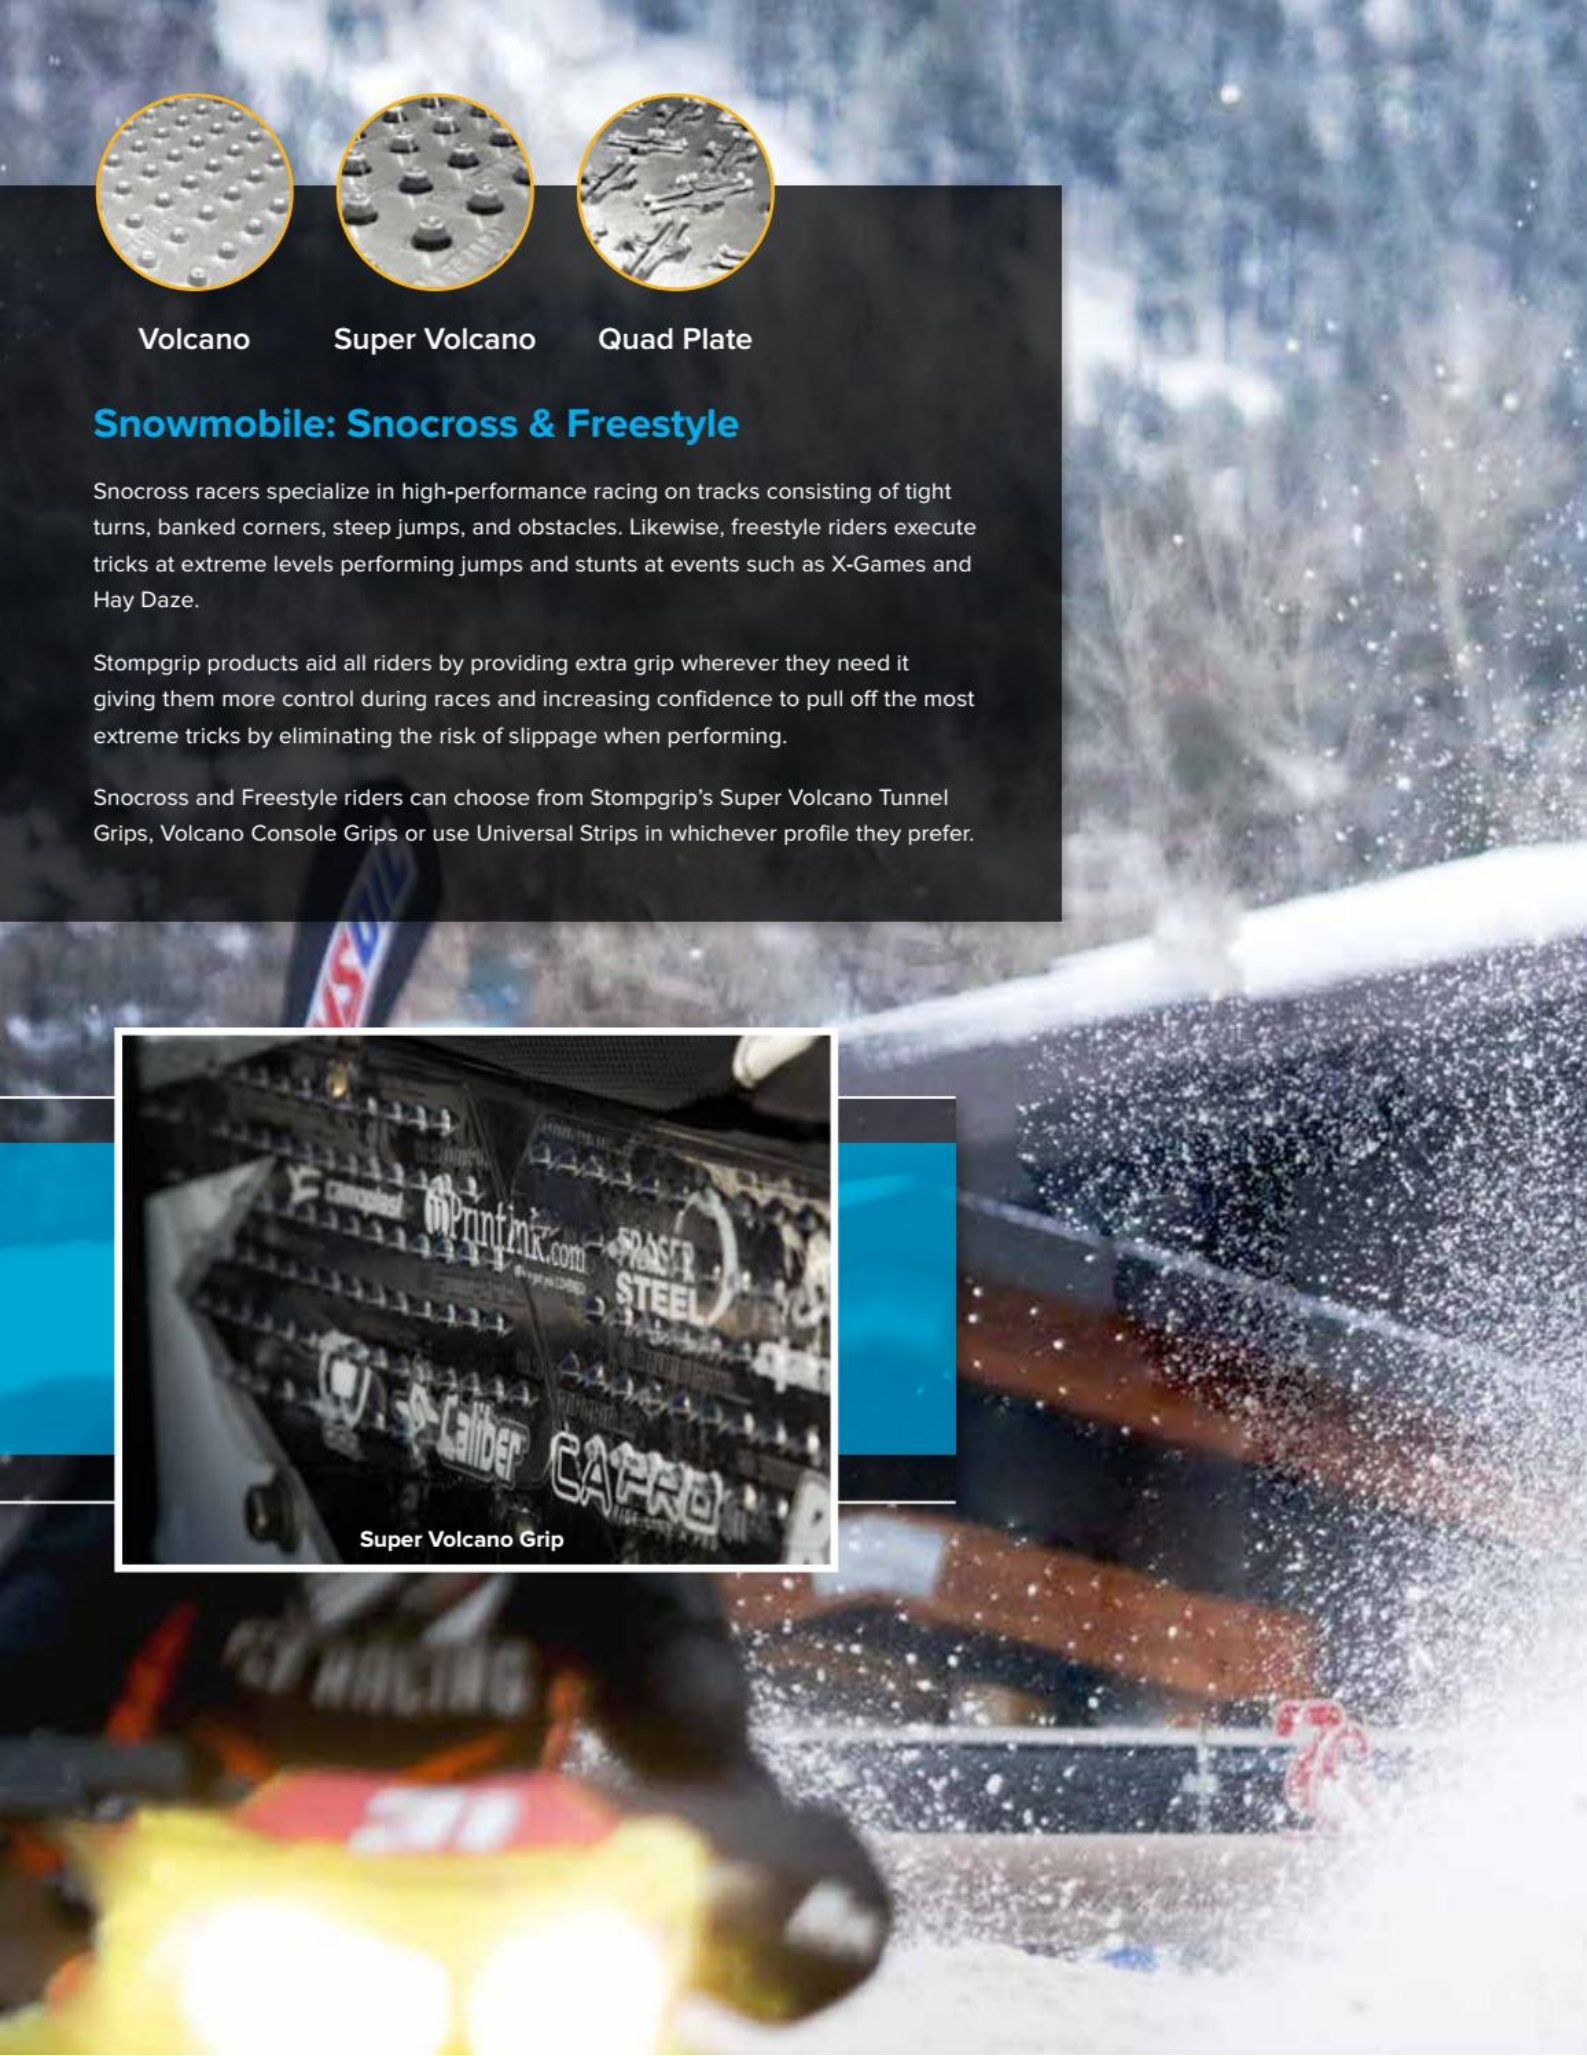

Snocross racers specialize in high-performance racing on tracks consisting of tight turns, banked corners, steep jumps, and obstacles. Likewise, freestyle riders execute tricks at extreme levels performing jumps and stunts at events such as X-Games and Hay Daze.

Stompgrip products aid all riders by providing extra grip wherever they need it giving them more control during races and increasing confidence to pull off the most extreme tricks by eliminating the risk of slippage when performing.

Snocross and Freestyle riders can choose from Stompgrip's Super Volcano Tunnel Grips, Volcano Console Grips or use Universal Strips in whichever profile they prefer.

Universal Grip

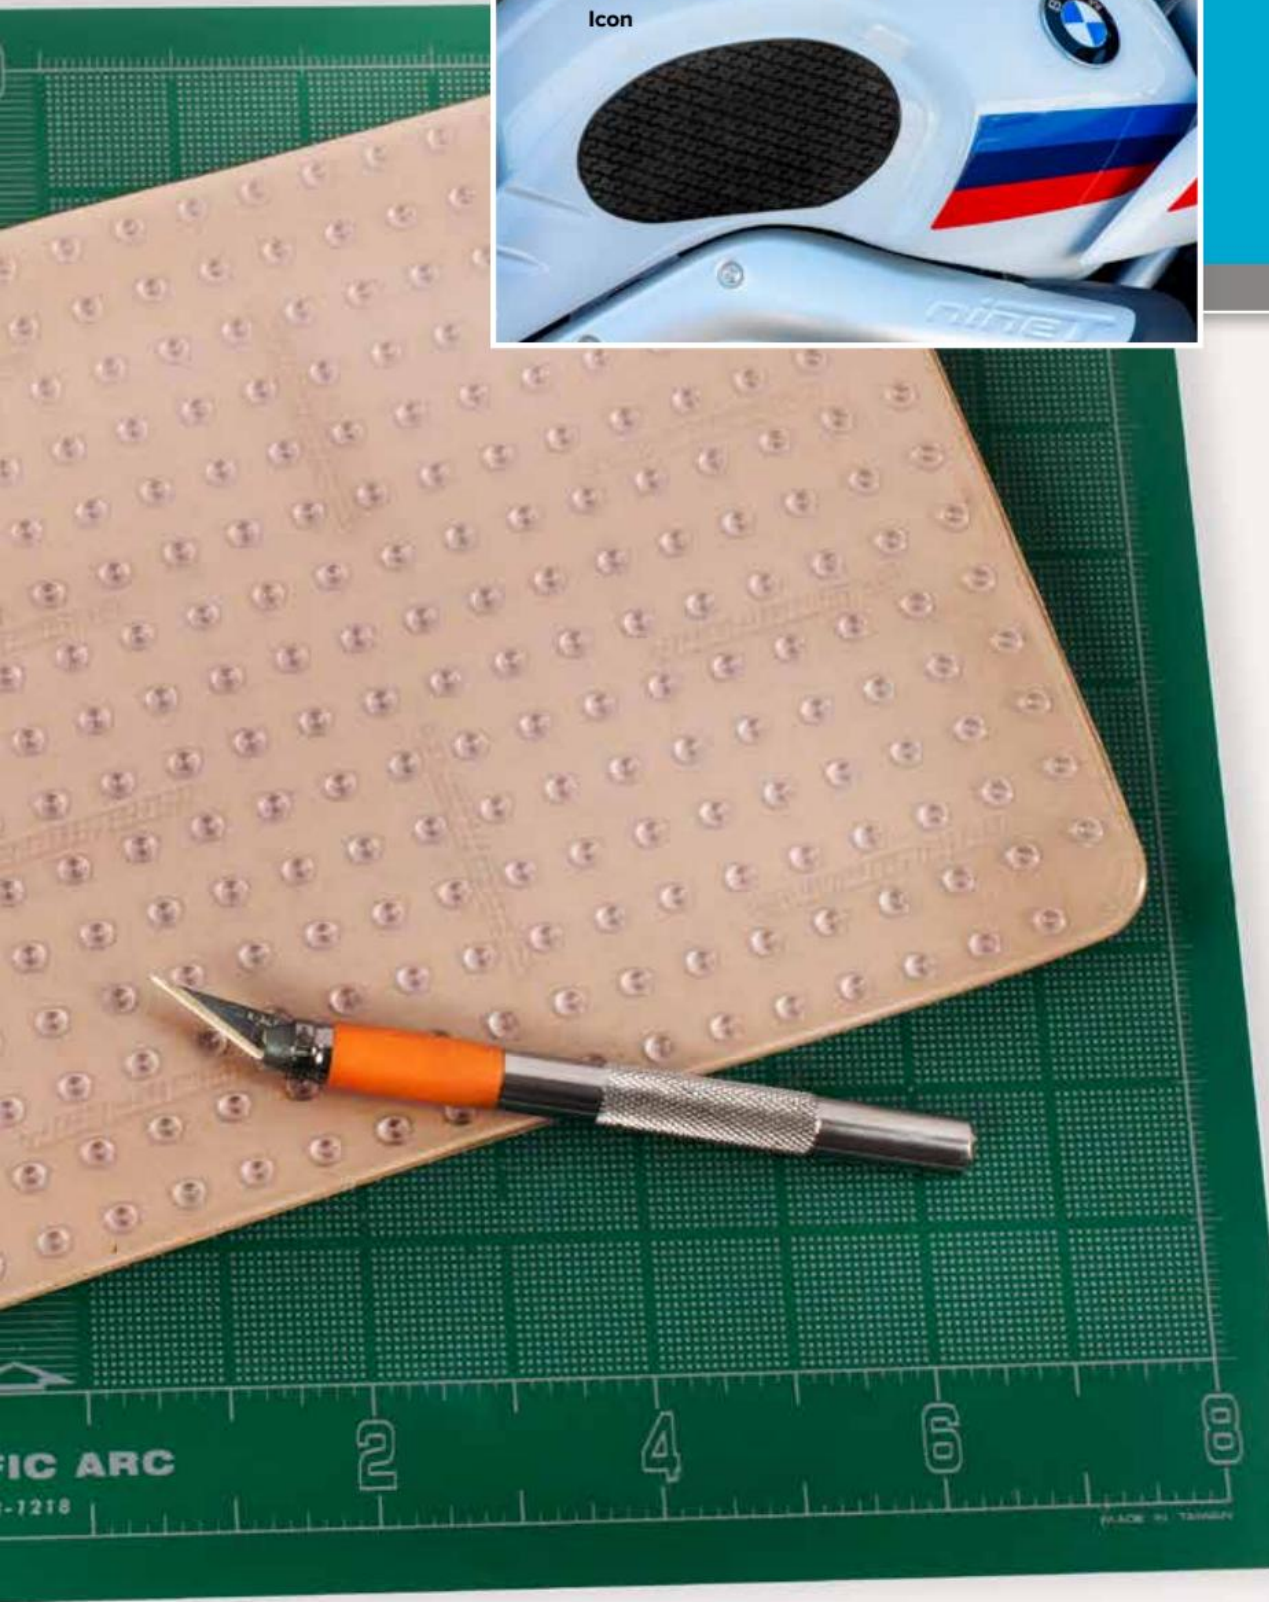

Stompgrip's Universal product line is made up of three distinct groupings of grips:

Tank Shapes: The Large and Small Streetbike based on a generic sport bike tank and the Universal Sprint, Rally and High Boy tank shapes based on different sized café racer tanks.

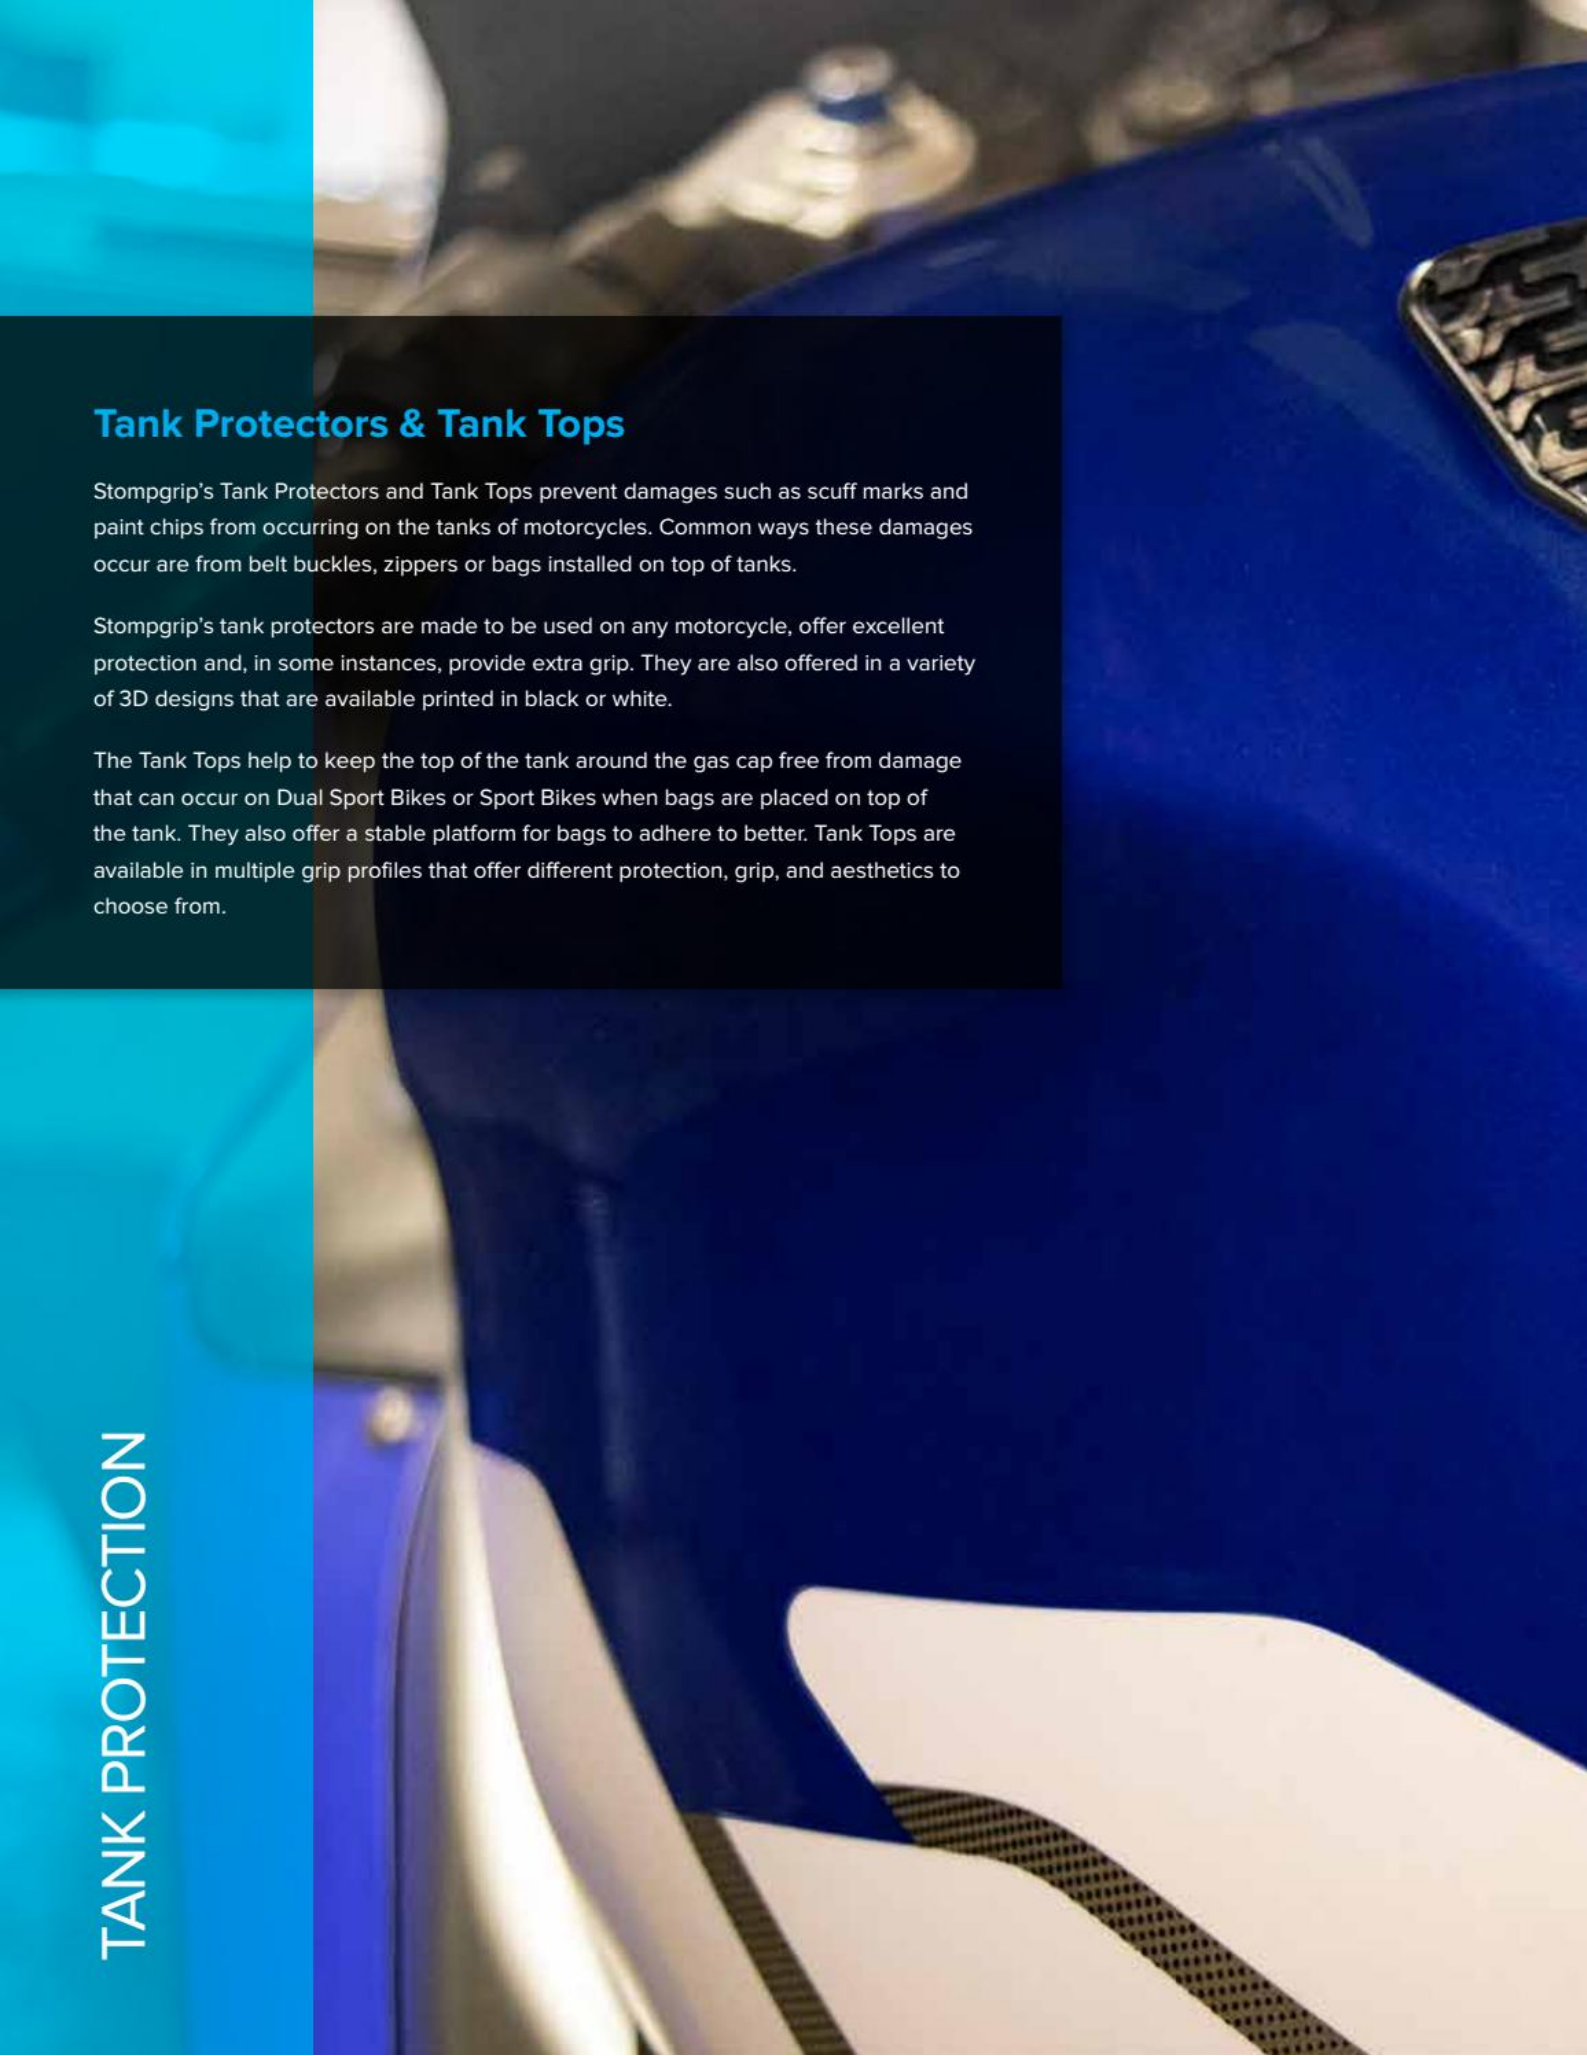

Geometric Shapes: Ovals, Wedges, and Quadrilaterals.

Mini Strips, Strips, and Sheets: The Universal Strips and Sheets can be used as is for larger applications or can be "cut-to-fit" as necessary which allows Stompgrip to provide a traction solution for every vehicle. The Universal Mini Strips function well as frame rails on dirt bikes or can be placed anywhere a rider prefers extra grip.

UNIVERSAL GRIP

Tank Protectors & Tank Tops

Stompgrip's Tank Protectors and Tank Tops prevent damages such as scuff marks and paint chips from occurring on the tanks of motorcycles. Common ways these damages occur are from belt buckles, zippers or bags installed on top of tanks.

Stompgrip's tank protectors are made to be used on any motorcycle, offer excellent protection and, in some instances, provide extra grip. They are also offered in a variety of 3D designs that are available printed in black or white.

The Tank Tops help to keep the top of the tank around the gas cap free from damage that can occur on Dual Sport Bikes or Sport Bikes when bags are placed on top of the tank. They also offer a stable platform for bags to adhere to better. Tank Tops are available in multiple grip profiles that offer different protection, grip, and aesthetics to choose from.

TANK PROTECTION

A close-up photograph of a blue motorcycle fuel tank. A black, textured tank protector is mounted on the tank. The protector has a repeating, wavy, geometric pattern that resembles a stylized 'W' or a series of interlocking shapes. The blue paint of the tank is visible around the edges of the protector. The background is slightly blurred, showing what appears to be a workshop or showroom setting.
