

TANK GRIPS

Stompgrip's Tank Grip product line is made up of three product groups: Universal, Bike Specific (customized), and Tank Protectors and Tank Tops. Between these three product groups Stompgrip offers tank grips for every motorcycle and snowmobile on the market today.

There are many general benefits to riding with tank grips:

- Increase overall control of the vehicle by locking knees into tanks.
- Improve confidence in corners by eliminating the risk of slippage.
- Reduce arm pump by relieving pressure on wrists.
- Prevent sliding on the seat under acceleration.
- Assist in maintaining a stable body position.
- Stop riders and passengers from sliding forward when braking (i.e. no nutcracker experience).

There are specific tank grip product features that only Stompgrip offers:

- Available in clear or black.
- Available in Bike Specific (customized) and Universal for all applications.
- Available in multiple traction profiles for different riding needs.
- Rounded edges to avoid snags and peeling.
- Custom designed and injection-molded specifically for power sports vehicles.
- Manufactured with highest quality 3M adhesives and proprietary plastic blend.
- Made in the U.S.A.

STOMPGRIP Tank Grips work for Street, Dirt, and Snow
