

TANK PROTECTORS & TANK TOPS

Stompgrip's Tank Protectors and Tank Tops prevent damages such as scuff marks and paint chips from occurring on the tanks of motorcycles. Common ways these damages occur are from belt buckles, zippers or bags installed on top of tanks.

TANK PROTECTORS

Stompgrip's tank protectors are made to be used on any motorcycle, offer excellent protection and, in some instances, provide extra grip. They are also offered in a variety of 3D designs that are available printed in black or white.

TANK TOPS

The Tank Tops help to keep the top of the tank around the gas cap free from damage that can occur on dual sport bikes or sport bikes when bags are placed on top of the tank. They also offer a stable platform for bags to adhere to better. Tank Tops are available in multiple grip profiles that offer different protection, grip and aesthetics to choose from.
