

SUPER-TRACTION GRID

ULTIMATE TRACTION FOR YOUR TOYS

IMPROVED TRACTION - HIGHLY ENGINEERED MATERIAL - HEAVY DUTY - RUGGED - DURABLE

- STRATEGIC GRID PATTERN - GRIP FOR ALL TRACK PITCHES & ATV TIRES
- ACCOMMODATES ALL SNOWMOBILE TRACKS, ATV TIRES & DIRT BIKE TIRES
- PROTECTION FROM STUDD TRACKS & TIRES

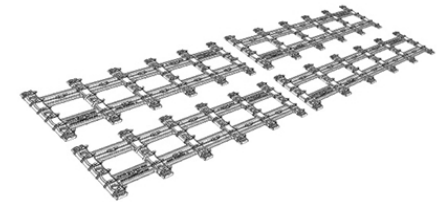

INSTRUCTIONS/INSTRUCTIONS:

1. Important - When you are installing your Traction Grids, you must leave $\frac{1}{4}$ " between grids. Failure to do so may result in the Traction Grid buckling or bowing.
 2. Align the grids to the track center of your snowmobile or measure the stance (width) of your ATV(s).
 3. Place the Super Grids on the trailer or ramp surface in the pattern shown in the illustration (Step 3).
 4. Begin to secure the Traction Grids to the trailer or ramp surface using the custom screws provided. Do not over tighten the screw head onto the grid (it is important that the Traction Grid expands and contracts with temperature change).
- *The Manufacturer assumes no responsibility for theft, injury, damages or loss arising from the use of this product however caused.
*Caution - characteristics of this product may change in use due to steepness of ramp, footwear or any other contributing factors such as severe weather, IE cold, wet, snow or mud etc. (extreme caution must always be used).
