

Ultragard® Cover For Can-Am F3 Spyder

Rice Lake, WI – With the Can-Am F3 being an all new Spyder, Ultragard® has an all new cover designed just for it. As is typical with Ultragard® covers, the seams are interlocked and double stitched so they will not pull apart. Made from durable polyurethane coated polyester for excellent weather resistance, this new cover is stylishly designed in black over charcoal with Ultragard®'s high visibility reflective piping allowing your ride to be seen at night and in the parking lot to avoid being hit. Includes two rust proof grommets with 10" bungee and coated hooks to allow the elastic hem to be securely fastened for a snug fit. An expandable zippered windshield pocket and zippered backrest pocket allows proper fitment for F3 Spydres with or without a windshield or backrest. A lined heat shield protects the cover from hot mufflers and added liner pads protect from wear at the mirrors, handlebars and tail lights where extra wear can occur. A handy zippered storage pouch allows easy repacking into a compact size for on Spyder storage.
